OUR
74th YEAR

No Home Planting
Is Complete Without
Dwarf Fruit Trees

(Refer to Pages 18 and 19
For Our Listing)

This Kodachrome taken August 31, 1953,
pictures 3-year-old Mary Elizabeth Kelly and
her sister, Patricia Ann, 2 years old, standing
beside a 4-year fruiting dwarf Red Delicious
apple tree.

KELLY BROS. NURSERIES, Inc.
DANSVILLE, NEW YORK

HYPERICUM, Hidcote

From a famous estate in England comes this new variety. It grows into a twiggish shrub about 18 inches tall and about the same in diameter. Throughout the summer it is covered with bright yellow cup-like flowers, about 2 inches in diameter, in a grand mass display. Flowers are fragrant and appear late June, continuing until mid-October. **\$2.00 each; 3 for \$5.50, postpaid.**

PYRACANTHA, Firethorn (*Coccinea Lalandi*)

A most remarkable berried shrub that retains its foliage all winter. The attractive long trusses of pure white flowers are only a prelude to the big show. An abundance of brilliant orange-scarlet berries follow the bloom and the bush becomes a "mound of flame" with the effect lasting well into the winter. Blooms in May. Grows 4-6 feet. **2-yr., 12-15 in., \$2.25 each, postpaid.**

ALTHEA COELESTIS

Bright morning-glory-blue flowers, 3 inches across, pop open every day from midsummer until winter. Pretty pansy-red centers and white pistils. Fine for cutting. Fancy green leaves. Grows 4 to 5 feet tall. **18-24 in., \$1.25 each; 2 for \$2.25, postpaid.**

"ADD THE UNUSUAL TO YOUR

OREGON GRAPE-HOLLY (*Mahonia Aquifolium*)

The thick, glossy leaves resemble Holly, but are much larger and most attractive. Makes a compact bush, and when pruned severely every few years will become an indescribable mass of green and bronze foliage. Yellow blossoms in June, followed by blue-black berries. Thrives in shade. Easy to grow. **12-18 inch, \$2.00 each; 3 for \$5.50, postpaid.**

DWARF RED BARBERRY

CRIMSON PYGMY. New introduction from Holland. Grows 6 to 8 inches high, 15 to 24 inches across. Slow growing. Ideal for planting in front of shrub planting. Best color when grown in full sun. We deliver 2-yr. field-grown plants 6-8 inches in diameter. **\$2.00 each; 3 for \$5.50, postpaid.**

FORSYTHIA, Lynwood Gold

This splendid new Forsythia originated in Ireland, and we predict it will replace before many years, all other varieties of deep yellow color.

The branches are erect and literally smothered under golden yellow flowers from top to bottom. For a magnificent show of golden yellow, there is nothing better. It is superb for cutting and flowering in the house during the winter months. It has been carefully tested for several years, and we recommend it without hesitation. Ultimate height 5 to 7 feet, depending on conditions. **\$2.00 each; 3 for \$5.50, postpaid.**

French Hybrid Lilacs

HARDY—EARLY BLOOMING

Prices: 18-24 in., \$1.75 each; 2 for \$3.25, postpaid.

CHARLES JOLY (Wine-Red)

A large free blooming Lilac. An old variety but still the best all around dark red.

BELLE DE NANCY (Pink)

Large showy compact cluster of fragrant flowers. One of the most splendid in flowering characteristics.

PRESIDENT GREVY (Blue)

A soft delicate blue that blooms in large showy pyramidal clusters that cover nearly the entire bush.

MONT BLANC (White)

The best of the whites. Very large and compact, putting on a snow-white appearance.

PRESIDENT CARNOT (Orchid)

A great favorite. Blooms very prolifically in long narrow clusters that attract attention of everyone.

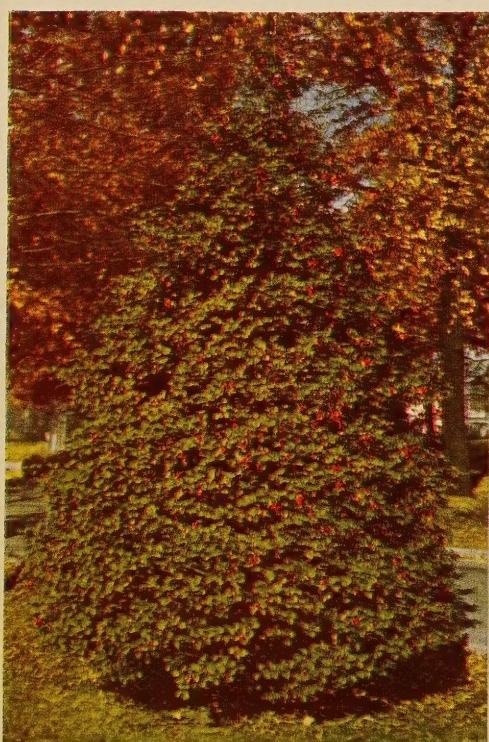

LILAC COLLECTION

- 1 Charles Joly (Wine-Red)
- 1 President Grevy (Blue)
- 1 President Carnot (Orchid)

GARDEN"

Nothing Finer to Grow Than This Hardy Type Christmas Holly

Ilex Opaca- **AMERICAN HOLLY**

By far the most famous of the Holly Family, the American Holly was once commonly found in most all wooded areas of the East.

Either by cutting, burning or from an attack of bugs and diseases it has all but disappeared, except for certain areas along the Eastern seaboard.

By selection and breeding, Holly experts have succeeded in propagating varieties that are hardy and comparatively free from diseases and insect attacks.

We now have a quantity of the most usual plant, which we are offering for the first time. The plants we have, have been selected for their early and heavy fruiting characteristics. They have been found hardy for several years in the Buffalo, New York area and in New England.

The trees are likely to do better where they are protected from strong winter winds and where they get some shade. A fertile, well-drained soil, on the acid side, is preferred. The use of leaf mold and peat moss in planting and as a mulch is recommended. A special Holly fertilizer is listed below.

Although the tree will grow 30 to 40 ft. tall at maturity, it looks best when kept trimmed to a compact size of 4 to 8 ft.

Evergreen in its nature, with the heavy crop of attractive bright red berries during the winter, as an accent plant in strategic corners, flanking walks or front entrances, it is in a class by itself. It is invaluable for planting in areas fairly close to the house.

Because the female and male flowers are produced on separate plants, at least 2 plants must be planted. Because the pollen from 1 male plant will pollinate the blossoms of from 2 to 10 female plants, we offer a combination of 2 female and 1 male plant in one package.

Special Holly Culture Booklet sent Free with each order.

All 3, 10-18 in., 3-yr. plants, only \$5.95,
postpaid.

Special Holly Fertilizer

Instructions for use in each package.

PLEASE READ BEFORE ORDERING YOUR SELECTIONS

1. Order now for shipment at planting time.
2. Unless you specify date, we will ship at the proper planting time in your section.
3. An envelope on which we pay postage is enclosed for your convenience.
4. For ordering, please use order blanks enclosed. Letters should be written separately to avoid confusion and mistakes, and to insure prompt reply.
5. Our terms are NET CASH with order. Unless otherwise specified, prices are f.o.b. Dansville.
6. A 25% deposit is required on all C.O.D. orders.

ALL THESE *Free Gifts* FOR EARLY ORDERS

THIS OFFER GOOD ON ORDERS RECEIVED ON OR BEFORE FEBRUARY 25th, 1954

On orders of \$10.00 to \$15.00 Select One of these 10 Premiums.
On orders of \$15.00 to \$25.00 Select Two Premiums alike or different.
On orders of \$25.00 to \$30.00 Select Three Premiums alike or different.
On orders of \$30.00 or more Select Four Premiums alike or different.

10 Latham (Red) Raspberries 10 Begonia Bulbs.
1 Rose Bush (Your choice of color) Not patented. 1 Fire King Lily.
2 Concord Grape Vines. 1 Bartlett Pear, 2-yr., large.
1 Red Flowering Crab, 2-yr., 3-5 ft. 1 Hydrangea P. G. Shrub.
1 Wisconsin Weeping Willow Tree, 3-5 ft.

The Premiums you select MUST BE WRITTEN ON THE ORDER, or none will be sent, even if you notify us later.

Our Guarantee

We positively GUARANTEE any nursery stock you buy from this catalog to grow. If any tree, bush, shrub or plant from our nursery does not grow, we will replace it ABSOLUTELY FREE the next growing season.

All we ask is that you follow the planting instructions mailed with your order acknowledgement and give the plants good care.

Report on losses to reach us ON OR BEFORE AUGUST 1st, FOLLOWING PLANTING.

We ship only STRONG, HEALTHY STOCK OF THE BEST QUALITY. That's why we can make such an iron-clad guarantee.

HOW TO REMIT

Send Money Order or Check with your order. You save money by sending remittance with order. The Post Office and Express Company make extra charges for C.O.D. shipments.

QUANTITY RATES

Take advantage of our lower rates for quantity purchases. For less than 6 trees remit at each rate; 6 to 12 trees of one sort such as Apples, varieties alike or assorted, entitles you to the 12 rate; 12 to 25 trees alike or assorted, entitles you to the 25 rate; 25 or more trees, alike or assorted, entitles you to the 50 rate.

RIPENING DATES

With our description of varieties, we've indicated the approximate ripening date at which fruit is ripe and ready to eat in western New York. This date will vary with the season and in different sections of the East. The fruit may ripen a few days to a week earlier or later.

OUR REFERENCES

As to our responsibility and reliability, we refer you to the Union Trust Co., Dansville, N. Y.; Groveland State Bank, Groveland, N. Y.; Security Trust Co., Dansville, N. Y.; to any person whose letter appears in this catalog, or to your State Experiment Station or College.

FREE PLANTING GUIDE

With every order we will send absolutely free a book which, by word and picture, shows just how to plant a tree or shrub.

WE PAY POSTAGE

Most plants listed in the catalog are delivered to your home postpaid.

Trees too large for parcel post shipment are sent by express—you pay the charges.

Where there is a mixed order of postpaid and express items, we ship the whole order express, prepaying in advance, our portion of the charges.

RA-PID-GRO

THE MIRACLE PLANT FOOD

1 pound of Ra-Pid-Gro added to 22 gals. of water gives you a complete, quickly available, easily prepared plant food.

Analysis: 23% Nitrogen, 21% Phosphate, 17% Potash

WHAT IS RA-PID-GRO?

Ra-Pid-Gro is a complete, concentrated plant food. It is made into an immediately available, effective liquid plant fertilizer by simply adding water. It speeds up growth of plants now in place, and assures more successful transplanting of new plants.

HOW IS IT USED?

Just add water at the rate of 1 lb. of Ra-Pid-Gro to 22 gallons of water. It is ready to use as soon as the Ra-Pid-Gro dissolves. Apply around each plant according to directions on the package. For a small number of plants mix at the rate of 1 teaspoonful to a quart of water.

WHAT WILL IT DO?

Ra-Pid-Gro works almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreen shrubs, roses, perennials, vegetables and house plants. All the vital plant food elements are present in this remarkable discovery and, since it is applied in liquid form, are readily available to the roots of the plant.

PRICES:

1 pound Ra-Pid-Gro	(makes 22 gals.)	\$ 1.25, postpaid
2 pounds Ra-Pid-Gro	(makes 44 gals.)	2.35, postpaid
5 pounds Ra-Pid-Gro	(makes 110 gals.)	4.50, postpaid
10 pounds Ra-Pid-Gro	(makes 220 gals.)	8.75, postpaid
25 pounds Ra-Pid-Gro	(makes 550 gals.)	21.00, postpaid

↓ What Users say about RA-PID-GRO

Gentlemen:

My small garden has improved so much under the RA-PID-GRO treatment that I no longer use other fertilizers except for digging in peat moss and rotted manure in the fall, and my plants are stronger and have more blooms than ever before.

Wm. C. Butler
1810 Newton Avenue North,
Minneapolis 11, Minn.

Dear Sirs:

Last year I foolishly tried a different growing product, and had a garden and flowers that I was truly ashamed of. So I am going back to old reliable RA PID GRO. I had used this for several years, and everyone admired my yard and garden.

Sincerely,
Mrs. O. W. Howe

Dear Sirs:

I think it (RA-PID-GRO) is the most wonderful plant food in the world. I had sickly, scrawny plants, especially my Roses, and after treating them with RA-PID-GRO, they are thick with lovely green leaves and twice as high, and they are really beautiful.

Sincerely,
Mrs. Charles Cohan
24 Edgemont Road,
East Braintree, Massachusetts

Dear Sirs:

I would never think of having a garden without it (RA-PID-GRO). Last summer in spite of a severe drouth, we grew Sweet Peas over seven feet tall, loaded with bloom until frost, late in October. Sincerely,

Mrs. Katherine Chapin

The Feathery TAMARIX

SUMMER GLOW. There is a lacy loveliness and charm about this shrub not found in others. Beautiful silvery blue-gray foliage is like a veil. A sharp and delightful contrast is made by the airy Tyrian rose flower spikes appearing on top of the delightful foliage all summer. Lovely for cutting. Very tolerant to salt air and wind. Ultimate height about 8 feet. Can be pruned and kept to 5 to 6 feet if desired.

12-18 in.	Each 2 for \$1.50	\$2.95
18-24 in.	2.00	3.75

Improved Chenaulti CORALBERRY

Indian Curant

A 3 to 4 ft. shrub with delicate, little, pink flowers against a reddish green foliage, followed by coral-colored berries that remain most of the winter. Keep birds near, with abundance of these berries.

	Postpaid	Each	3 for
18-24 in.		\$0.95	\$2.70
2- 3 ft.		1.15	3.25

CALYCANTHUS

(Sweet-Scented Shrub)

Many know it as the Carolina Allspice. The handsome, bronze-chocolate flowers produced in June are most entrancing, because of their spicy fragrance. Odd looking pods develop later which are filled with brown, aromatic seeds. Glossy corrugated foliage adds to its unusual appearance. Grows 4 to 6 feet tall, and spreads over an area equally broad.

	Each	2 for
18-24 in.	\$1.00	\$1.75
2- 3 ft.	1.25	2.25

5 BUDDLEIAS

CHARMING. Long sprays of lavender-pink.
DUBONNET. Large sprays of wine-red.

ILE DE FRANCE. Violet-purple and very fragrant.
ORCHID BEAUTY. Orchid-pink with brilliant orange eye. Flower heads up to 24 inches in length.

ROYAL RED. (Pat. No. 556). Rich dark royal purple. Large sprays 2 feet in length. New variety of merit.

Each 95c; 3 for \$2.70, postpaid.

RED FLAME BUSH

Red-Leaved Barberry

Very charming all season with its flattering bronze-red foliage. Adds that spot of color needed to brighten up the landscape. Must be planted in a sunny location to maintain its rich red coloring. Grows naturally to a height of 3 feet, but may be pruned to any size or shape desired.

	Each	3 for
18-24 in.	\$0.90	\$2.55

DEUTZIA

Pride of Rochester

A Beautiful Shrub That We Highly Recommend
for Every Home Garden

Vigorous, upright, hardy and free blooming. Small, white, Carnation-like flowers, changing to red in center. Grows 5 to 6 feet at maturity. **18-24 in., 95c each; 3 for \$2.70. 2-3 ft., \$1.15 each; 3 for \$3.25, postpaid.**

THERE IS NOTHING LOVELIER THAN LILACS

The living landmarks; hardy and vigorous in any soil or climate, growing 6 to 8 feet tall. Large clusters on Decoration Day, very fragrant. **Offered in both Purple and White. State color desired. 18-24 in., \$1.00 each; 2 for \$1.75. 2-3 ft., \$1.25 each; 2 for \$2.25, postpaid.**

COTONEASTER DIVARICATA

The Berried Shrub That is Particularly
Adapted to Accent Corner of a
House Planting

Is upright in growth, though the branches are spreading. The leaves are pointed, glossy green above, lighter below, turn red in autumn. The flowers are pink and appear in June. The fruit is oblong, ripening in August and September, and stays red for a long period. Grows 3-5 ft. **18-24 in., 95c each; 3 for \$2.70. 2-3 ft., \$1.15 each; 3 for \$3.25, postpaid.**

Sweet Scented VIBURNUM

Blossoms Toned Light Pink—

With Spicy Fragrance

(Viburnum Carlesii)

This grand shrub is generally called the Pink Snowball. In the spring it is covered from top to bottom with very fragrant flowers that are light pink on the outside and the inside snowy white. It makes a nicely shaped bush 5 to 6 feet tall and just as wide, with branches right down to the ground. The deep green foliage colors a bronzy red in the fall. Is planted from coast to coast. It adds beauty and distinction to your planting.

Spiraea Van Houttei The Practical Shrub
As an Individual Shrub

Probably the best known of all the shrubs. Will tolerate shade and adverse city conditions. Grow in any soil. The pure white flowers which completely cover the arching branches in May, transform the bush into a thing of beauty. This most popular Spirea develops into a 4 to 6 ft. shrub, which may be used for specimen planting or for a hedge. It increases in beauty each successive season. Should be included in all plantings.

Lily-of-the-Valley Flowering Shrub

Andromeda . . . Pieris Japonica

Originated in the mountains of Japan, so it is hardy as far north as Boston. Blooms profusely with tiny waxy white bell shape flower about 1/3 inch long. The foliage retains its green color throughout the winter. Grows slowly but eventually attains a height of seven to eight feet. Can be grown in full sun but prefers a partially shaded area with soil on the acid side. **\$2.00 each; 2 for \$3.75, postpaid.**

**The Exotic
BLUE MIST Spiraea
(Caryopteris)**

One of the best low-growing fall-blooming shrubs. It makes a neat, compact, rounded bush about 2 feet tall, with narrow, silvery green foliage. From August to frost, it is covered with the many clusters of dainty blue flowers. The roots are hardy, but like a Peony bush, you cut off, each spring, the old canes and new ones come up. You are sure to like this shrub.

No. 1 plants, \$1.00 each; 3 for \$2.70, postpaid.

Rose Gold PUSSY WILLOW

New. In late February or March has thousands of silvery catkins which progress through a fascinating series of color changes. First silvery gray, then turn silvery pink, then rosy pink dotted with hundreds of bright yellow stamens, finally become nearly solid gold. Low mound-shaped plant. Attractive silvery foliage stays until winter. Catkins large, last for weeks and weeks. Can be forced indoors. Grows 4 to 6 ft.

TO GROW

EUONYMUS ALATUS COMPACTUS

(Burning Bush)

Yellow flowers in May-June, followed by red fruits. In autumn the leaves turn brilliant coppery crimson tinged rose. Has unusual corky bark. Thrives in partial shade or full sun. Perfectly hardy, makes a compact bushy plant 4 to 5 feet wide. Not particular as to soil. Very ornamental and attracts attention spring, summer, fall and winter.

Each 2 for
12-18 in. \$1.75 \$3.00
18-24 in. 2.25 4.00
Postpaid

HYDRANGEA PEE GEE

A tall, stately shrub growing to 4 feet in height. Branches bending over with giant cone-shaped flowers which are white at first, then pink and late in fall turning to copper and bronze. When cut, they last for weeks inside.

	Each 3 for
12-18 in. \$0.75 \$2.15

VITEX a Lavender-Blue Shrub

A 4-foot, dainty shrub of branching habit, which bears long spikes of lavender-blue flowers, forming a beautiful contrast to the silvery green foliage in August and September. **18-24 inches, 95c each; 3 for \$2.70, postpaid.**

MINNESOTA SNOWFLAKE

(Plant Pat. No. 538)

Grow This Welcome New Garden Shrub—a Lovely Improved Mock Orange, Fragrant, Extra Large Double Flowers

The season of flowering is early summer. This plant is thoroughly hardy, a vigorous grower and long-lived. It will grow to a height of 8 feet. It can be kept to the desired height by trimming. It is a strong grower; therefore very useful for screen, tall border and specimen plantings.

	Each	2 for
18-24 in.	\$1.25	\$2.25
2- 3 ft.	1.50	2.75

KELLY'S FLOWERING SHRUBS FOR COLORFUL

If your garden has common, unsightly and overgrown shrubs that are detracting from everything around them, it is time to modernize.

Far from being an attraction, quite likely these "Old Men" of the garden have seen their best days and should be replaced with the modern young and vigorous flowering shrubs.

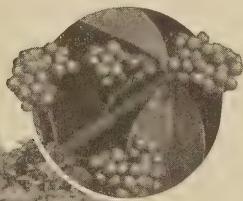

BEAUTY BERRY

(Callicarpa Purpurea)

A graceful five-foot shrub that blooms in August with small pink tinted flowers. This is followed in September by quantities of violet-purple berries that hang until midwinter. Grows 3-5 ft.

	Each	3 for
15-18 in.	\$1.00	\$2.75
18-24 in.	1.25	3.50

PURPLE FRINGE or Smoke Tree

*Something to Rave About
The One and Only Cloud-Like Foliage Tree
That Looks Like a Volume of Smoke
A Worth-While Addition to the Garden*

A tree much admired for its curious fringe or hairlike flowers that cover the whole surface of the plant. Handsome foliage adds its share of beauty to the plant. Likes plenty of sunshine and light, well-drained soil. Grows to a height of 10 to 12 feet, and its spreading habit requires considerable space. Especially desirable as a specimen tree. **Each 2 for**

HONEYSUCKLE ZABELI

(Lonicera Zabeli)

A Worth-While Garden Shrub Also Makes Excellent Hedge

Red Flowers, Red Berries, Attractive to Birds
Can be trimmed to low or medium height.

The most shapely bush and the finest foliage of all the bush Honeysuckles. A marvelous accent or specimen shrub. If you want a stunning flowering hedge at 4 to 5 feet, this is it. Sturdy, upright growth; attractive blue-green leaves. If you wish to keep it thick and formally trimmed, plant 1½ feet apart, but for its true informal beauty, plant 3 feet apart.

	Each	2 for
18-24 in.	\$1.00	\$1.75
2- 3 ft.	1.25	2.25

GARDENS.....

It is surprising the excellent results that can be obtained for so little expense, turn to pages 16-17 for suggestions on home plantings. Remember Kelly Bros. are always happy to help you at any time.

DEUTZIA GRACILIS

A charming little "must" for every garden. Slender twigs covered with white flowers in May and June. Generally attains a height of 3 feet when fully matured.

Low Growing—Excellent for Foundation Planting

Does Not Block Out Windows Because of Dwarf Growing Habit

HIGH BUSH FLOWERING CRANBERRY BUSH

A Tall Growing Variety — Excellent for Screening Out Unightly Places

Quick Growing Habit — Fall Berries Are Attractive to Birds

One of the finest background and screen shrubs. Upright-spreading habit and healthy, deep green, 3-lobed leaves. Flowers heavily in May and June—white, flat clusters. Large clusters of scarlet berries remain in winter, make a valuable tart jelly. Bright red fall foliage color. Grows equally well in shade or sun and in normal to wet soils.

	Each	2 for
18-24 in.	\$1.00	\$1.75

Extra Large PUSSY WILLOWS

Always Welcome for House Decoration

No bouquet would be complete in early spring without a few sprays of Pussy Willows. Grows 10 to 12 ft. high. Catkins are at least twice as large as those of the common Willow. They do well in damp locations.

	Each	2 for
18-24 in.	\$0.95	\$1.75
2- 3 ft.	1.15	2.20

Postpaid

Gentlemen:

I want you to know how happy we are over our Kelly Garden. All the fruit trees are just beautiful. Last year we had the most beautiful Peaches. Our garden is only four years old but it looks like it was ten years old.

The berries were all very good. We have every kind and they are just lovely.

Thank you for all the nice plants you have sent me in the past. Mrs. George W. Hoyt, Cresskill, N. J.

Gentlemen:

I am sorry to be so slow about acknowledging the arrival of nursery stock recently.

Never have I seen such careful wrapping nor rarely have I seen such a completely satisfactory filling of an order. Each plant, including the dividends, was just what any gardener hopes to receive. Thank you for your careful consideration. You will be receiving orders from me and from my friends.

Dr. George E. Murphy

NANKING CHERRY BUSH

(Prunus Tomentosa)

Lovely Cherry-Like Blossoms
That Bloom Before
The Leaves Appear

A fine shrub with attractive clean looking foliage. The stems are covered with a profusion of Cherry-like bloom before the leaves appear in early spring. The fruit, an attractive bright red Cherry, is similar to sour red Cherry in flavor. Good for pies and jam. A good plant for filling the corner between house and porch. Grows 3-5 feet.

	Each	2 for
18-24 in.	\$1.00	\$1.75
2- 3 ft.	1.25	2.25

[13]

SCARLET QUINCE

The Fire Bush

A first choice for rich, happy spring color for both indoor and outdoor beauty. Covered with masses of semi-double, brilliant scarlet flowers, even before the attractive shiny green leaves appear. This 3-5 ft. is a "must" in landscaping.

Each 3 for

18-24 in. \$0.95 \$2.70

GOLDFLAME HONEYSUCKLE

From June until freezing, this magnificent vine is covered with showy clusters of large, fragrant flowers, rosy flame outside and gold inside. The attractive foliage, a rich blue-green, makes a perfect background for the brilliant flowers. Hardy, thrives in full sun or partial shade. It can be used in so many places—trellis, porch, pergola, fence, fine for covering bank or can be trained as a shrub. **Each 3 for**

2-yr., large \$1.15 \$3.25

Postpaid

RED SPIRAEA

A choice, low growing shrub, distinctive in style and form. It produces masses of showy, bright crimson flower clusters in July, and if the old blooms are cut away, it will continue to bloom until frost. Nice for specimen planting as well as in groups. Ultimate height 18 to 24 inches.

SHRUBS FOR MODERN PLANT

CUSHION MUMS Produce Bushels of Blooms

A Sensational Creation of the Flower Kingdom

One of the most popular garden favorites. Plant these beautiful flowers 2 to 2½ ft. apart in well-drained soil. They do well in full sun or partial shade. Our Cushion Mums are hardy and will bloom from late August up to the time of severe frosts.

BRONZE CUSHION. A large round plant if planted alone with hundreds of blossoms on at the same time. Requires little care, and is one of the prettiest of the Cushion Mums.

PINK CUSHION. It's the oldest of the Cushion Mums, but one of the best. Makes a very large plant by early fall, loaded with blooms, often hiding all the leaves when fully in bloom. It's a sight in early September till late fall.

RED CUSHION. Blossoms are fiery red color that blends in well with the others. It has been known to have 500 blooms and some buds on 5 months after set out. Starts to bloom in September and continues until freezing weather.

WHITE CUSHION. Pure white blooms. Blossoms freely, like all the other colors. You will like this color to mix with the others.

YELLOW CUSHION. A bright yellow and blooms earlier than other colors. A thousand blooms open at one time on a well-cared for plant is a common sight. Everyone likes a yellow Mum.

5 for \$1.95; 10 for \$3.75, postpaid.

BLUE HYDRANGEA

Blooms of charming blue throughout the summer. Most preferred of all Hydrangeas, due to its form and color. Soil should be very acid to bring out the blue color. To maintain soil acidity, mix 4 or 5 tablespoons of Aluminum Sulphate to a gallon of water, and apply to the soil for 2 to 3 weeks during the growing season. Aluminum Sulphate is listed on page 20. Grows in partial or full shade. Mound earth up around plant 10 or 12 inches for winter protection, same as for Roses. A real novelty.

2-yr. Each 2 for \$1.75
3-yr., large 2.25 4.00

Dwarf Pear, Apple,
Cherries, Peaches
and Plums.

INGS

LYTHRUM, Robert

A sight to behold. Graceful spikes are covered almost from the ground to their 3-4 ft. tips with deep pink flowers. Blooms all summer. Hardy—developed in Canada, and grows anywhere. **Selected**

2-yr. plants: 95c each; 3 for \$2.70.

Postpaid

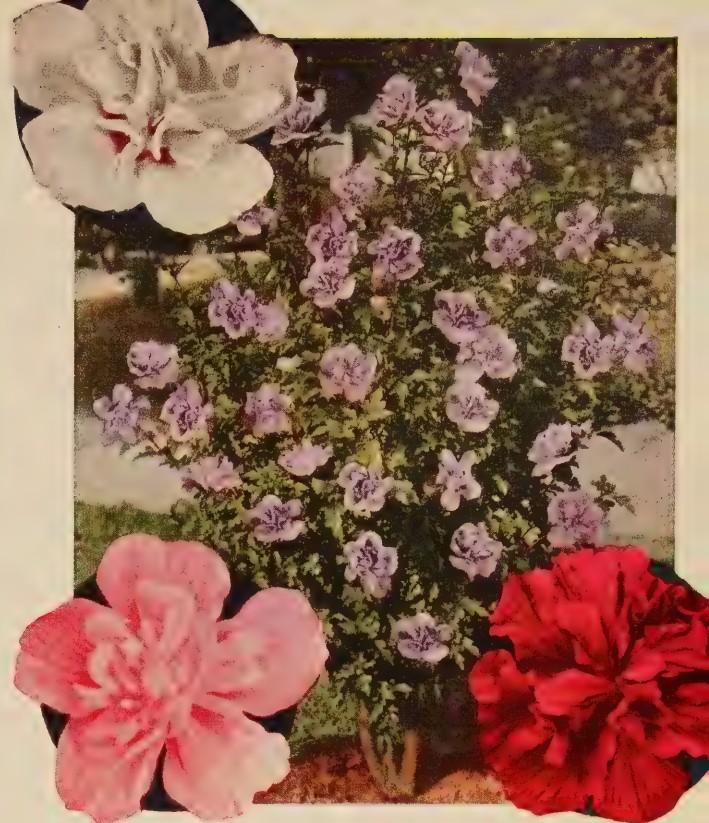

WINTERBERRY

EUONYMUS RADICANS ERECTA. A broad, spreading shrub clothed in rich bright green foliage that remains on the plant year round. It's a plant that blends well with established evergreen plantings. Thrives in sun or partial shade. Makes a shapely bush 4 to 5 ft. tall with red berries which hang on late in the season. This is not an ordinary shrub. Be the first to have it in your neighborhood.

GOLDEN SYRINGA (Philadelphus Aurea)

Always a "showy" shrub because of its all-season golden yellow foliage. Flowers are intensely white, with a fragrance which is delightful, more delicate, yet as penetrating in the garden as that of the Jasmine. Grows to a height of 4 to 5 feet, and is not fussy about location—doing well in smoky or dusty places.

15-18 in.	Each	2 for	\$2.00	\$3.75

PROFESSIONAL LANDSCAPE SERVICE

at No Extra Cost

Now you can enjoy experienced, professional advice for beautifying your home grounds without charge. Savings on your purchases. Savings run as high as 30% to 50% when you buy direct from us, the growers.

EASY TO USE. All we need is a drawing or photograph of your home and grounds. A photograph is preferred. We also need to have approximate dimensions of house and lawn.

Your photograph or drawing will be turned over to one of our experienced nurserymen, who has had years of experience in recommending and supervising landscape plantings. We will select the plants which will give you the most attractive arrangement for your grounds, and will send you a sketch indicating the location of each plant. Only plants best suited to your locality will be recommended. Complete instructions for planting will be included.

CATALOG PRICES. At the same time, we will tell you exactly what the plants he recommends will cost. There is no EXTRA CHARGE for our service. Your plants will be quoted at regular catalog prices. NO PLANS CAN BE PREPARED AFTER APRIL 1st.

GROUP I

DWARF PEARS

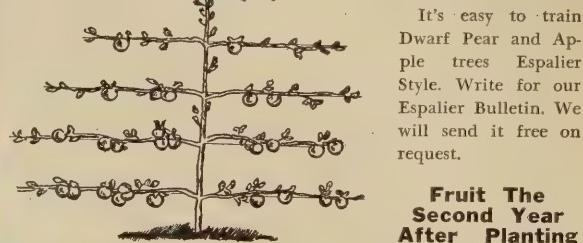

All Kelly's Dwarf Pear trees are budded on Quince roots. This is the only known way to horticulturists to successfully grow Dwarf Pear trees. We list only 4 varieties, Bartlett, Clapp's Favorite, Duchess and Seckel, which we have found to do best on this rootstock. Other varieties, such as Beurre Bosc, and Kieffer, do not make a good union. Most of the Dwarf Pear trees we are offering this year have borne fruit in the nursery row. They will bear fruit after you have planted them at least the second year and bring many years of enjoyment and scores of successful crops as they develop into their full size.

VARIETIES

It's easy to train Dwarf Pear and Apple trees Espalier Style. Write for our Espalier Bulletin. We will send it free on request.

Fruit The Second Year After Planting

DWARF FRUIT TREES

FRUIT THE SECOND YEAR AFTER PLANTING

DWARF APPLES

All Kelly's Dwarf Apple trees are propagated by placing the variety on a special type of Malling Rootstocks, which were developed in England and which are imported from that country. These trees at maturity will reach a height of 12 to 15 ft. tall and they can be planted 15 to 20 ft. apart in your home orchard. Besides being a beautiful addition to the landscaping of your home they develop crops of fruit each year. You will have much enjoyment standing on the ground picking fresh luscious fruit from these small trees within 2 years after you plant them.

The Wonder Plum of the Age

HOWARD'S MIRACLE PLUM

Its tantalizing and delicious flavor, great size, firm and amber flesh, together with a delightful color, place the "Miracle Plum" in a class by itself.

An astounding surprise to the palate, flavor not unlike Nectarine, Peach and Plum mixed; skin thin, and unnoticeable when eating fruit. Keeps well, delicious in preserves, fruit ripens over long period during July and August. Will bear fruit second year after planting. Beautiful ornamental tree of medium size, richly tinted foliage in autumn like the leaves of a Maple. Can be grown in a small garden.

DWARF CHERRIES

GREAT NEW NORTHERN STAR. Very hardy—will succeed farther north than any other Cherry. It is a cross between a very hardy Siberian Cherry and the English Morello. It is a Morello type of pie Cherry and at first the fruit is a bright red changing to a mahogany-red. The skin is tender and the flesh is juicy, meaty and tender. The tree is small by nature but very productive. Ripens July 5th to 10th, and the fruit will hang on the tree in good condition for about two weeks. Promises to become a leading commercial variety. **2-3 ft., \$3.25 each; 2 for \$6.25, postpaid.**

BRILLIANT NEW METEOR. A cross between Montmorency and a very hardy small fruited unnamed Cherry from the Canadian Experimental Station at Morden, Manitoba. The cross was made by the Minnesota Fruit Breeding Farm. It first fruited in 1944 and since then has never missed a crop. Hardy in Northern sections where other Cherries cannot be grown. The tree is a strong and vigorous grower. The fruit is large to very large and is a very attractive clear bright red with thin skin and tender. Ripens midseason in relation to other sour Cherries. Self-fruitful. **2-3 ft., \$3.25 each; 2 for \$6.25, postpaid.**

DWARF PLUM. You will enjoy seeing these trees growing in your yard. Prolific crops of delicious fruit on small 8-9 ft. trees. **Each 2 for**

age makes 4 gallons. **1 oz., 50c; 3 ozs., \$1.00, postpaid.**

SPECIAL CALIFORNIA PATTERN PRUNER

This new anvil-type one-hand pruner has been carefully designed and manufactured to cut better and easier and to last longer than other anvil-type pruners. Blade will not distort. Steel cutting blade is rigid and eliminates spreading of the blades when making parallel or diagonal cuts on large branches. Exclusive plastic covered comfort grips are easy on the hand. No slipping—no blisters. Positive thumb lock is conveniently located—no more danger of pinching hands while cutting. Approximate length, 8 in., approximate weight 12 ozs. **\$2.75 each, postpaid.**

All-Purpose Hoe

**A "Must" For Every Gardener
JUST WHAT YOU NEED FOR
YOUR GARDEN**

\$1.75, postpaid

The goose-necked shank permits close cultivation of small plants. Weighs only 1½ lbs. but the "All Purpose" Hoe is stronger than most other hoes. Women find that they can use the "All Purpose" Hoe without fatigue. The "All Purpose" Hoe will weed and mulch between plants and in corners that no other hoe can reach. It will dig dandelions, plantain and weeds from your lawn without disfiguring it. Blade is the finest oil-tempered spring steel and has 7 inches of cutting surface. Hardwood handle is 44 inches long, finished in natural color. Shank and blade are bronze welded.

RITESIZE COMPRESSED AIR SPRAYER

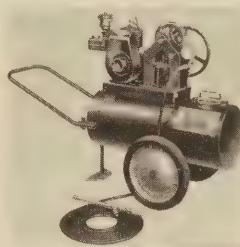

Very popular, made of heavy Armco Zinc-grip steel, 5½" opening for easy filling and cleaning. Capacity 2 gallons. Seamless brass pump, 24" brass extension. **\$9.90, postpaid.**

50-FT. SPRINKLER WEIGHS 1 LB.

This flexible plastic sprinkler can spray an area 15 ft. wide by 50 ft. long at average water pressure. Drapé it over your hillside, twine it around your flower beds, shape it to any contour of your landscaping—it'll do a perfect sprinkling job in any position! This durable sprinkler will not rot or mildew, even if stored wet! The spray is so fine it's gentle on flowers—a real water saver! Turn the valve and it becomes a soaker. Complete with brass connector. **20-ft. length, \$2.50; 50-ft. length, \$4.75, postpaid. 5-yr. guarantee.**

CHAMPION No. 600 POWER SPRAYER

THE STREAMLINED BLIZZARD SPRAYER The Best in Small Hand Sprayers

Sprays anything in liquid form, giving a continuous, unbroken mist with easy, slow pumping. Built for years of service. Twin nozzle, seamless brass pump, solid copper tank—even a child can operate it! Prepaid.

BRADSHAW PLUM

A very large and fine early Plum. Attractive, dark violet skin with yellow flesh. Very juicy; excellent for dessert use and for canning. The tree is hardy, and a vigorous grower. Especially desirable because of its ability to produce heavy crops of delicious fruit annually. Bradshaw is recommended for the home orchard as well as for the commercial grower. September 5-10.

STANLEY

A Better Kelly Prune

The best for commercial planting or home use. Bears fruit in 3 years and ripens 10 days earlier than other varieties. Exceptionally productive. Fruit large, deep bluish purple, firm and sweet; of excellent flavor. Introduced by the New York State Experiment Station, and is becoming a valuable commercial variety. Bears annually. Mid-season. Sept. 20-25. Same price as other Prune trees.

PLUM and PRUNE TREES for Early Crops

SHIRO PLUM

A Golden Yellow Winner

A very early Plum. Beautiful golden yellow variety. Tree is low growing, hardy, very prolific. Excellent for cooking, canning and dessert use. People who like Plums should be sure to plant this variety. Ripens Aug. 8-15.

DAMSON. Fruit is medium size, dark purple, produced in thick clusters. Good to eat out of hand when fully ripe or after a light frost. One of the best of its kind for culinary purposes. Tree a good grower and very productive. September 24-28.

ABUNDANCE PLUM. Trees are adaptable to wide range of soils and climates, and bear not only heavily but yearly. Fruit large, very early, amber turning to a rich, bright cherry. Flesh light yellow, very juicy and tender. Freestone. Good for canning. Should be picked when not quite ripe, as it keeps better and taste develops better. August 15-20.

BURBANK. Fruit very large, bright reddish purple. Meaty and quite firm. Should be picked before entirely ripe. Best colored fruit attained when thinned on the trees. Trees are low growing, flat-topped with somewhat drooping branches. Productive and vigorous. Good shipper. Aug. 25-30.

FELLEMBERG PRUNE. Also known as **Italian** and **German**. Widely known and valuable Plum for dessert, but most esteemed for market and drying for preserving. Fruit is long, oval, purple with a thick bloom. Flesh firm, sweet and pleasant, separating freely from stone. Moderate growth. A great favorite and there is always a good market for them at profitable prices. September 24-26.

SANTA ROSA. A very promising Oriental variety. Fruit is handsome, dark reddish purple. Large with very juicy, red flesh of good quality. Tree is large, vigorous and moderately productive. Aug. 20-26.

REINE CLAUDE or BAVAY'S GREEN GAGE. Has beautiful fruit, large, pale yellow, marked with red if the crop is thinned and sufficiently exposed to the sun. Trees attain only moderate size in the orchard, are productive and bear regularly. Deserves a place in the home orchard. September 25-30.

POLLINATION

With the exception of the Prunes, Fellemburg, German, Stanley, etc., which are self-fruitful, Plums should be interplanted to insure a set of fruit—European varieties for pollinating that class and Oriental sorts for those varieties.

Abundance, Burbank and **Santa Rosa** are Oriental varieties, balance are European varieties.

SERVICE**

Amherst, Mass.
August, 19, 1953

All of the Apple, Pear, Plum, Sweet Cherry, and 2-yr. Sour Cherry varieties propagated and now growing in the nurseries of Kelly Brothers Nurseries, Inc., Dansville, New York, have been examined by the Massachusetts Trueness-to-name Inspection Service. To the best of our knowledge, these trees are true to name as they now stand in the nursery row.

A. P. French

See Descriptions, page 24.

KELLY'S APPLES

NORTHERN GROWN • TOP QUALITY • PROLIFIC CROPS

5 GOOD APPLES In Color on Page 23

CORTLAND. An Apple of the McIntosh type combines the high quality and flavor of the McIntosh, and tendency to hang to the tree of the Ben Davis. The fruit of Cortland is larger than that of McIntosh, round in shape. Color bright red splashed with carmine and overlaid with purplish bloom. October-February.

DOUBLE RED DELICIOUS. A large, dark red Apple, with crisp, fine-grained flesh of excellent quality and flavor; a splendid keeper and shipper. Tree one of the hardiest. A regular annual bearer. Excellent for eating and the most popular fruitstand Apple. Nov.-March.

YELLOW DELICIOUS. A bright, golden yellow Apple of excellent quality. Firm, crisp, and very juicy. Splendid keeper. Bears young and heavily. October to April.

RED McINTOSH. (Rogers Solid-Red Strain.) Without doubt the leading commercial variety of New York and the New England States. A very attractive red Apple of the highest quality. Hardy, bears young and annually. Flesh white, fine, very tender, juicy and refreshing, with attractive flavor. October-January.

RED ROME. Red sport of Rome Beauty, and like Gallia Beauty is identical with its parent in all characteristics except fruit is a solid red color. December-May.

DAVEY. Plant Pat. 906. A McIntosh seedling from the orchard of S. L. Davenport, North Grafton, Mass. Thoroughly tested, we can recommend it. Bears early and annually. Resistant to scab. Blossoms with McIntosh, matures with Baldwin. Distinct flavor of its own. Texture resembles Wealthy. Size and shape similar to McIntosh. Easy to handle, good shipper. Price: 2-yr. trees, \$1.50 each; 3 for \$4.00; 10 for \$12.50.

GENERAL LIST OF APPLE TREES SUMMER APPLES

Months listed after description indicate the time at which the fruit is at its best for general use. Dates indicate time of ripening.

RED DUCHESS. A solid red strain of the old Duchess of Oldenburg. One of the hardiest varieties grown. Fruit is large, striped red in color. A good early eating Apple. Vigorous grower. Regular and prolific bearer. Excellent for pies and sauces. August 5-10.

LODI. A new fruit that closely resembles one of its parents, Yellow Transparent, but the fruits are larger and ripen a little later. An annual bearer that is becoming a commercial variety. August 10-15.

MILTON. Bright pinkish red, large, flesh tender, very white and a refreshing aroma. An early and annual bearer. Excellent for home and roadside markets. September 15-20.

RED GRAVENSTEIN. A new red sport, much more attractive than its parent. Differs from old Gravenstein, being solid dark red in color, is a better keeper and hangs better on the tree. September 10-15.

RED ASTRACHAN. One of the best summer varieties, as it becomes fully ripe and ready for home use from late July to August. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good though rather acid. Tree medium size, yielding good crops. August 2-6.

FALL APPLES

EARLY McINTOSH. For home orchard or commercial use this is the ideal early variety to plant. Resembles its McIntosh parent with its handsome red color and uniform, round shape. The tree is a vigorous grower, hardy and productive. Tends to be a biennial bearer, although for annual crops early thinning is recommended. It comes into bearing at an early age. The flesh is white, tender and juicy with fine flavor. August 15-25.

WEALTHY. Beautiful, moderate sized, brilliant red Apple; fine quality. Owing to hardiness of the tree, its adaptability to cold climates and early bearing habits, can be profitably planted as a filler. September 15-20.

YELLOW TRANSPARENT. Fruit of good size; skin clear white turning to pale yellow; flavor acid and very good, making it excellent for cooking. Begins to ripen some time in July and continues for 3 or 4 weeks. Tree very early and abundant bearer. August 3-7.

WINTER APPLES

Months listed after descriptions indicate the time at which the fruit is at its best for general use.

BALDWIN. Yields large crops and is an excellent shipper. Highly regarded as an eating and cooking Apple, having a flavor all its own. Fruit is large, bright red, crisp, juicy and rich. December-March.

MACOUN. A late McIntosh type Apple ripening about 10 days later than McIntosh. Dark red with whitish, close-grained flesh. Fine quality. A heavy and regular bearer. Introduced and recommended by N. Y. Experiment Station. November.

MONROE. A Grand New Apple from the N. Y. Experiment Station. Named and introduced for trial in 1949. Tree upright-spreading, vigorous and an annual bearer. Fruit large, roundish conic; color similar to Jonathan, its maternal parent. Flesh yellowish, crisp, juicy and mildly sub-acid; quality good. Winter Apple that offers possibilities for dessert and culinary uses. Supply limited—order today. 1-yr. trees, \$1.50 each; 3 for \$4.25; 10 for \$12.50. 2-yr. trees, \$2.00 each; 3 for \$5.75; 10 for \$17.50.

NORTHERN SPY. Easily ranks among the very best winter Apples. Fruit is large, very attractive, being of bright red color with a pronounced bloom. Flesh is juicy, crisp and excellent for dessert or culinary purposes. Keeps well in storage until April or later. November-April.

RED SPY. A new red sport identical with Northern Spy, except that the fruit is a solid bright red without either stripe or splash. Much handsomer than its parent. November-May.

RHODE ISLAND GREENING. As a cooking Apple it is unsurpassed, and as a dessert fruit of its season, has few equals. It is a good keeper but keeps better if picked early. This Greening is a beautiful yellow color when ripe and an abundant yielder. December-April.

ROME BEAUTY. Yellow and red-striped Apple of excellent quality. Prolific annual bearer. Early bearer and good keeper. Profitable commercial sort for New York, Ohio, Pennsylvania, and West Virginia. December-May.

STAYMAN. Comes into bearing young. A reliable cropper. Medium to large size fruit. Slightly striped. Coloring to dull red. December-March.

YELLOW DELICIOUS. See illustration, page 23, and description, above.

KELLY'S FAMOUS BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and is adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. Sept.-Oct. (Sept. 1st-10th.)

CLAPP'S FAVORITE

Precedes Bartlett, which it resembles in size, shape, color and flavor. It is the first Pear on the market. Large, pale lemon-yellow fruit with brown dots. Fine texture, juicy, buttery, with a rich, sweet, delicate vinous flavor. Tree hardy and productive. Thrives where other varieties fail. August 15-20.

KELLY'S DELICIOUS PEARS

BEURRE BOSC Quality Pear

A Pear which is rated by all as "very good" or "best." Has a long, tapering neck and a long stem which allows it to sway in heavy winds without dropping. Brownish yellow in color. Flesh is tender, buttery, very juicy, with a rich flavor and pleasing aroma. The tree is a slow grower, but most productive. Oct. to Jan. (Sept. 25-30).

PEAR BARGAIN

**1 Bartlett, 3-4 ft.
1 Clapp's Favorite, 3-4 ft.
2 for \$2.95, Postpaid**

SECKEL

The Pear to plant for eating fresh and pickling. Medium size, skin rich yellowish brown with deep, brownish red cheek when fully ripe. Flesh very fine grained, juicy, sweet and good. Trees resistant to blight, very productive and hardy. Should be planted in fertile soils, not heavy clay. September and October. (September 20-25.)

DOLGO CRAB

A handsome Red Crab Apple. This is an especially valuable tree because it is equally attractive when in flower or when laden with its abundant brilliant red fruits. Very juicy, jellies easily, and makes a rich ruby-red jelly of beautiful color and excellent flavor. Makes exceptionally good cider. Ripens Sept. 3-4 ft., \$2.00 each; postpaid; 3 for \$5.75; 10 for \$15.00. 4-5 ft., \$2.25 each, postpaid; 3 for \$5.95; 10 for \$17.50.

Kelly's Famous ORANGE QUINCE

FOR DELICIOUS JELLY

Its pre-eminence as a fruit for jellies and preserves makes the Quince a profitable tree for the fruit grower, the farmer or anyone having a small garden. The Quince tree does not take much room on account of its dwarfish character. It can be grown in bush or tree form. Fruit is large golden yellow and of excellent quality. Makes delicious jells. Ripens early in September. Grows 10 to 15 feet tall. Produces abundantly. 2-yr., 3-4 ft., \$1.90 each, postpaid; 3 for \$4.80; 10 for \$13.00. 2-yr., 4-5 ft., \$2.25 each, postpaid; 3 for \$5.95; 10 for \$17.50.

Write for prices in larger quantities.

Kelly Favorite Quince
The Finest Variety Grown

Other Selected PEARS-Not Illustrated-All Kelly Grown Trees

ANJOU. This is one of the best late fall and early winter varieties for the market, its season lasting until way into January, even in common storage. Large fruit, green in color, but turning to yellow when ripe, dotted with russet. The yellowish white flesh is firm, but tender, very juicy, sweet, spicy, with a rich, vinous flavor. Trees hardy and vigorous growers, come into bearing early. October to January. (September 25.)

DUCHESS D'ANGOULEME. The fruits excite admiration and wonder by their enormous size. Always known by this characteristic. All dull, greenish yellow spotted russet. Trees are vigorous, hardy and healthy. It is a particularly desirable sort for the Pear fancier. November to December. (September 25-30).

GORHAM. A seedling of Bartlett and closely resembles its parent in all characteristics and ripens from 3 weeks to a month later. It rivals Bartlett in all good qualities, being as large and handsome and as good or better to eat or to can. Fine canner—introduced by the New York State Experiment Station. (September 10-25.)

KIEFFER. Large fruit, rich yellow in color, with red cheek. Very juicy. Good for canning, which brings out its flavor. Trees vigorous, fruitful, and are least susceptible to blight. November to February. (October 1-10.)

SHELDON. The fruits please both the eye and palate. It is distinctive in its russet skin with a ruddy cheek. Flesh is juicy and deserves to be called luscious. Flavor is sweet, vinous and highly perfumed. Keeps well and ships well. Trees are vigorous and hardy. October. (September 20.)

TYSON. The Home Orchardist's First Choice. The quality of this old favorite is far superior to that of commonly grown Pears. The tree is a thrifty grower and very hardy—fruit is medium size, juicy with a spicy, scented sweetness that gives the fruit the charm of individuality. (Ripens late in August.)

GOOSEBERRIES

Strong Grower . . . Delicious Fruit
DOWNING. A medium size, whitish green Gooseberry of good quality. Strong, upright grower and quite prolific; midseason, July 10 to 15.

POORMAN. Largest fruit of the American Gooseberries. Attractive red. Prefers heavy soil. Bush very vigorous. Highest quality of any Gooseberry.

PIXWELL. A new variety considered the best on the market today. A very heavy bearer with the berries being a light green that turns to pink when fully ripe. Will bear the next year after planting and the bushes are not nearly as thorny as the other varieties.

Selected, 2-yr. plants, \$1.25 each; 2 for \$2.25, postpaid.

LUCRETIA DEWBERRIES

Of the Blackberry type, but produced on a trailing vine instead of an upright bush. The fruit is earlier, larger, attractive black, firm, and of excellent quality. Plants are disease resistant. **1-yr., No. 1 plants, 6 for \$1.20; 10 for \$1.50; 25 for \$2.75, postpaid.**

Thornless Boysenberries

Giant Size—Delicious Flavor

Canes smooth as velvet. Ripens 10 days to 2 weeks earlier than the common Boysenberry. The thornless strain retains all the good characteristics of its parent, including its rugged, thrifty growth. You will enjoy picking these large, juicy berries without a chance of scratching your hands. **Select Plants, 3 for \$1.15; 6 for \$2.05; 10 for \$2.55; 25 for \$4.65, postpaid.**

KELLY'S HEAVY BEARING BUSH BERRIES

CURRANTS

RED LAKE. The new, giant red Currant. A pleasure to pick. Berries are large, dark red in color, and on long, well-filled branches. Very hardy. Ripens over a long season. Long stems make picking easy. **Select, No. 1 plants, 70c each; 3 for \$1.80; 10 for \$5.50; 25 for \$13.25, postpaid.**

WILDER. Unsurpassed commercial sort. Bunches and berries very large, bright, attractive red, of excellent quality. **Strong, 2-yr. bushes, 70c each; 3 for \$1.80; 10 for \$5.50; 25 for \$13.25, postpaid.**

Important:

When ordering Gooseberry or Currant plants, it is necessary to have the following information:

1. County and Township where planting is to be made.
2. Approximate distance from nearest stand of White Pine (Five-Needled Pine).

If you do not receive the Currants and Gooseberries with your order, you will know we are holding them for the permit. If the permit is not granted, refund will be made.

NUT TREES for delicious food as well as shade

BUTTERNUT

A fast growing tree that bears within 2 to 3 years after planting. Nuts are large, with sweet, oily, nutritious kernels. Wonderful for nut cookies and cake, and those long winter evenings.

Postpaid	Each
2-3 ft. trees	\$1.50
3-4 ft. trees	2.50

ENGLISH WALNUTS

Very Meaty and Thin Shelled

A fine, lofty growing tree, producing large crops of thin shelled, delicious nuts. Makes a desirable shade tree. Not hardy in colder sections except where planted in sheltered location. **3-4 ft. trees, \$2.50 each, postpaid.**

BLACK WALNUT

Grows in all states. Produces large, flavored kernels. Tree is fast growing and produces very large nuts. A mature tree will produce from 12-36 bus. of giant nuts. Grows 25-40 ft. tall and should be planted 40 ft. apart. **3-4 ft. trees, \$2.00 each; 2 for \$3.75, postpaid.**

CHERRIES

Commercial growers interested in 50 or more trees, please write for our Commercial Price List.

Many people often ask which varieties we would suggest for planting. We highly recommend Windsor, Emperor Francis, Napoleon, and Schmidt's Bigareau. Each one pollinates the other—any combination of two or more gives desired results.

BLACK GIANT

Was introduced by Luther Burbank in 1914. Tree is large, vigorous, very productive. Cherries are attractive in size and color; the crop is late, coming in season just before Lambert, which the black fruits resemble. Quality is excellent and less subject to cracking than Bing. One of Burbank's most notable productions.

EMPEROR FRANCIS

The Queen of All Sweet Cherries

Recognized as one of the newer leading sweet Cherries for home and commercial orchards. This high quality Cherry resembles Napoleon in size and color except that it becomes a little darker. Ripens around July 4th. Sold at same prices as regular varieties.

Pollination

Sweet Cherries are self-unfruitful, so must be interplanted. Where Napoleon, Bing and Lambert are to be planted together, another variety, such as Windsor or Black Tartarian must be added, as the first three will not pollinate each other. The Sour varieties are self-fruitful.

2 NOVELTIES

KELLY'S BEACH PLUM

(Prunus maritima)

Ideal as a shrub—also produces delicious fruits. Bears first or second year after planting. Grows 6 to 8 feet at maturity. Hardy; does well in poor soil. Beautiful white blooms late in the spring before the leaves appear. Purple fruit, ripe in September, makes excellent jelly. Selected plants, \$1.95 each, postpaid.

CULTIVATED ADAMS ELDERBERRY

For Wines and Jellies

The large berries and extra large fruit clusters of this new improved variety are far superior to common varieties. Grows 5 to 6 feet tall. Popular for pies and home-made wines. Beautiful as an ornamental plant. **Bearing Size Plants, \$1.25 each; 2 for \$2.25.**

For commercial planting, write for prices.

Commercial growers interested in 50 or more trees, please write for our Commercial Price List.

EARLY RICHMOND

Fruit small but good and the earliest of the sour. Unsurpassed for cooking purposes. This is the variety that yields such marvelous crops in the home gardens. Most hardy of all varieties. Uninjured by the coldest winters. Tree slender in growth, with a roundish, spreading habit. Ripens June 25-30.

ENGLISH MORELLO

Fruit is handsome in appearance, real tart. Is recognized as the standard late sour Cherry, taking the place of Montmorency after its season is over. Cooking gives the fruit a rich, dark wine color, very attractive in appearance and a pleasant, aromatic flavor. Tree is small, upright spreading with drooping branches. Ripens July 20-30.

ALL KELLY CHERRY TREES are shipped with a New York State Dept. of Agriculture Certificate, certifying that our trees are budded from healthy trees and guaranteed to be virus free.

MONTMORENCY America's Famous "SOUR" Cherry

Always in demand by the home canner as well as the canning factories where they are canned by hundreds of tons. The trees are good bearers and the fruit ships well and appeals to the human eye for color as it is a bright clear red. Is good sized and has a fine flavor. Can be eaten right off the tree and makes excellent pies and other desserts. A variety that is hard to beat from any angle. Ripens about July 15.

NAPOLEON CHERRY

Sweet White Oxheart

This is a choice sweet, yellow Cherry of the highest quality, known as the White Oxheart. Good for market and canning. Pale yellow with attractive bright red cheek; flesh firm, flavor rich and sweet. Fruit keeps well so fruit dealers like it for the market. Trees productive and come into bearing early. Ripening date July 7-10.

KELLY'S CHERRIES

BLACK TARTARIAN - Sweet

Well known and popular sweet Cherry; very large, bright purplish black, juicy, and has a rich flavor. Excellent for canning and a good shipper. Trees are remarkably vigorous and erect growers, produce immense crops. Ripening date June 20-July 4. 1-6

SCHMIDT'S BIGGAREAU

Sweet

A midseason black sweet Cherry. Considered one of the best large varieties of its season. Delicious to eat fresh and canned, and very attractive. Fruit grows in clusters. Keeps well and is an excellent shipper. In size it is usually unsurpassed by any black Cherry in the East. Ripens about July 10.

WINDSOR

Sweet Black Oxheart

One of the best quality dark Cherries, often referred to as Black Oxheart. Has pinkish flesh and almost black skin. Large, juicy and firm. Delicious to eat fresh, and wonderful for canning. Used extensively for fancy preserving. Tree grows upright and is a rapid and vigorous grower. A good commercial variety. Ripening date July 20-26.

Rhubarb

Choice

VALENTINE. Newest and best of the red Rhubarbs. It is sweetest of all, requiring the least sugar. Makes delicious pies and bright red sauce. Excellent for home use and freezing. Out of 25 varieties tested in Canada, "Valentine" rated highest. Color was an even bright red; texture smooth and tender. Flavor pleasing with a slightly tart after-taste." **\$1.00 each; 2 for \$1.85; 6 for \$4.85, postpaid.**

RUBY RED. Another new red Rhubarb introduced from Canada. The stalks are intensely red, even the flesh is red. Rhubarb sauce made from Ruby is as red as Strawberry sauce. Skin so tender it can be cooked with the stalk. Prolific yielder. **85c each; 3 for \$2.45; 6 for \$4.50, postpaid.**

CANADA RED. The reddest of all Rhubarbs. Has large, tender, juicy stalks that are rich red all the way to the heart and even to the midribs in the leaves. Skin so tender you need not peel it. **Canada Red**, a heavy producer, can be used throughout the season. **\$1.00 each; 2 for \$1.85; 6 for \$4.85, postpaid.**

NEW RED LEAF PEACH

The Sensational New Ornamental

Bright red foliage appears early in the spring, changing gradually to deep maroon towards fall. Deep rose blossoms contrast beautifully with the colorful foliage. This sensational tree produces a full crop of small perfectly round Peaches, about 1½ inches in diameter. Fruits have an over-all red color slightly splotched, and ripen quite late. **3-4 ft., \$2.00 each; 2 for \$3.75. 4-5 ft., \$2.25 each; 2 for \$4.25, postpaid.**

NEW!

CHINESE CHESTNUT

A FINE LAWN TREE • FRUIT SO GOOD TO EAT

Hardy, Blight Resistant

These new blight resistant trees will bear nuts two years after planting. They are a fast growing tree and an ideal plant to take the place of the old-fashioned American Chestnut that we all remember from our childhood days. The fruit is fully as delicious as the native American Chestnut and slightly larger in size. Grows to 35 ft. tall. Best crops are insured by planting two or more trees for pollination.

RASPBERRIES and BLACKBERRIES

(See pages 39 and 40.)

Raspberries and Blackberries are easily grown fruits if their cultural requirements are met. An open, airy situation is best and the plants should be away from the root competition and shade of tall trees, but may be grown among the smaller fruit trees in the home garden. Most good farm and garden soils are suitable if not very heavy or very light, and are well drained so that water does not stand on or near the surface more than a few hours during the growing season. Keep black and purple Raspberries off the ground that has grown Tomatoes, Peppers, Eggplants or Potatoes the past two or three years. Get rid of old run-out Raspberries nearby to prevent disease spreading into the new planting.

Preparing the Soil

Fit the land thoroughly as for vegetables—plowing under a green crop or stable manure if the soil has been under constant cultivation. Red Raspberries and Blackberries may be planted in late fall or early spring, but fall planted plants should be mounded up to prevent them from heaving out during the winter. Tip plants of black and purple Raspberries should be planted in the spring. Space Raspberries in home garden 7 feet between rows and 2 feet between red Raspberries in the row, and 3 feet between black and purple varieties in the row. Set the plants the same depth they grew previously and be sure the soil is packed tightly so that the plant will resist a strong tug without loosening.

Cultivation

Weeds must be kept down by cultivation or mulching. Cultivation should be shallow and frequent enough to keep down weeds. Mulching is especially valuable in dry seasons. Straw, spoiled hay, weeds, lawn clippings, peat and sawdust are all suitable. When sawdust is used an extra feeding with a nitrogenous fertilizer is advisable. Cultivation should be discontinued after the crop is off or about August first and the weeds allowed to grow or buckwheat may be sown between the rows to check cane growth and harden the plants off for winter.

Fertilization

For fertilizers after the first year any of the following materials may be applied in early spring:

Nitrate of Soda, $\frac{3}{4}$ lb. per 100 sq. ft.
Ammonium Nitrate, $\frac{3}{8}$ lb. per 100 sq. ft.
Stable Manure, 3 bus. per 100 sq. ft.
Poultry Manure, 1 bu. per 100 sq. ft.

On soils low in fertility, especially sands or gravels, or eroded soils, supplement the nitrates with a 10-10-10 fertilizer at the rate of 1 lb. to 100 sq. ft. If new growth is too rank and winter-kills, reduce or discontinue the manure until lessened growth indicates its need.

Red Raspberries and Blackberries produce many suckers which must be kept within bounds. When cultivating or hoeing, restrict the row to one foot in width by removing all suckers coming up between the rows.

Raspberries and Blackberries must be pruned each year. The canes are biennial; they grow one season, bear fruit the second season and then die. After the crop is harvested the canes which bore it are cut out, leaving behind the current season canes to fruit

Professor George L. Slate is one of the country's leading "Small Fruit Specialists." He has supervised the breeding work that resulted in the introduction of such new varieties as September, Milton and Indian Summer Raspberries, Hedrick Blackberry, several varieties of Strawberries and many other plants.

the following year. In the spring the red Raspberry canes are cut back to a height of 4 to 5 feet, depending on the variety, and the weaker canes removed, leaving the canes spaced about 6 inches apart in a row a foot wide. Black and purple Raspberries are treated in a different manner. In June when the new shoots of black Raspberries are 18 to 24 inches high they are pinched off to induce branching. Purple Raspberries are pinched 6 inches higher. Blackberries are pinched at 3 feet. Do this as soon as the required height is reached in early June. The following spring cut the branches back to 8 to 10 inches for the black Raspberries, 10 to 15 inches for the purple Raspberries, and 15 to 18 inches for the Blackberries.

Fall bearing red Raspberries, such as Indian Summer, are pruned the same as other red Raspberries.

Blackberries that bloom, but produce no fruit or only poorly developed berries, should be sprayed just before the bloom with DDT at the rate of one pound of actual DDT to 100 gallons of water.

STRAWBERRIES

(See pages 42 and 43.)

Strawberries are one of the best home garden fruits, being valuable for dessert, freezing and jam, and unusually high in Vitamin C, outranking even the citrus fruits in that respect.

Location of Bed

The site should be sunny, away from the shade and roots of large trees, although interplanting among young fruit trees is satisfactory. The soil should be fertile, well drained and free from quack grass and other perennial weeds. Soils that will grow good vegetables are suitable for Strawberries, but the berries should not be planted where Tomatoes, Peppers, Eggplants or Potatoes have been grown for several years, as these may infect the soil with a wilt disease that is destructive to Strawberries. Keep the Strawberries a few feet away from the place where these vegetables have been grown. Grass sods may have white grubs and should be avoided until they have been cultivated two years. Manure or ploughing under a legume sod is good preparation.

Planting Time

Early spring, not August, is the time to set Strawberries. Space the plants 18 to 24 inches apart in rows $3\frac{1}{2}$ feet apart. The crown or solid center of the plant should be set even with the surface of the ground and the soil firmed so tightly against the roots by pressure of the foot that the plant will resist a strong tug without loosening. After the runners form, space them around the mother plants so that they are about 6 inches from each other and the row is 18 inches wide. Remove as weeds runners coming after the row is filled out. The first runners are the most productive.

Fertilizing

Manure at the rate of 3 to 6 bushels to 100 square feet at the time the ground is fitted will provide adequate fertility. Lacking manure, a 10-10-10 fertilizer may be worked in before planting, or applied as a side dressing at the first hoeing. A pound to 100 square feet is about right.

A nitrogenous fertilizer such as nitrate of soda, $\frac{1}{2}$ pound to 100 square feet, or ammonium nitrate at half that rate may be broadcast over the plants in late August when the foliage is dry, and immediately brushed off with a broom or piece of brush. Fertilizer should not be applied to the bed in the spring of the fruiting year.

Keep weeds out of the bed at all times, and the soil mellow to facilitate the rooting of runners.

Everbearing Strawberries grown in hills in beds of 4 rows spaced 12-15 inches apart each way with a 2-foot alley between beds and mulched with sawdust are much more productive than when grown in matted rows. All runners should be removed.

ON SMALL FRUIT GROWING

Winter Protection

In the fall, usually about mid-November and before temperatures get below 18-20° F. above zero, the plants should be mulched with straw to a depth of about 3 inches. In the spring, early April, just as the new leaves are starting from the crown, remove part of the straw to the space between the rows, leaving a thin covering over the plants for the leaves and blossoms to grow through and the fruit to rest on later.

Weed the bed about blossoming time if necessary. Do not fertilize the bed in the spring of the bearing year unless the soil is very poor, or the bed has not been mulched.

If the rainfall is less than one inch a week, irrigation may increase the crop. Apply enough water to equal an inch of rain per week. Over-watering may cause rotting of the berries.

GRAPES

(See pages 35 and 36)

Grapes should be grown in an open, airy situation to lessen injury from fungous diseases. Slopes are preferable as frosts are later than in low spots. Late varieties ripen better on the south side of a building or solid fence. The soil must be well drained.

Planting

Either one or two-year plants are suitable and may be set either in the fall or spring, but fall-set plants should be mounded up the first winter. Space vines 8 feet apart. Vines may be trained to arbors, porches or a trellis of two wires, one 2½ feet above the ground, the upper 2 feet above the lower. Posts about 25 feet apart with end posts braced.

Training

With Kniffen system of training the vine has a trunk to top wire and an arm in each direction on both wires. Newly set vines are cut back to one or two buds. New shoot is staked up to form a trunk and when it reaches top wire is pinched off and laterals led out, one along each top wire. The next year two laterals are led along the lower wires, the others, being rubbed off. Thereafter, at the annual pruning in the spring leave a strong lateral along each wire and remove other canes. Laterals should have 6 to 10 buds each. Leave more buds on vigorous vines, fewer on weak vines. If vigorous vines bloom well but set light crops, leave more buds next year. If vines overload and fruit fails to ripen well leave fewer buds next year. Grapes should not be summer pruned.

Fertilize with ammonium nitrate or nitrate of soda at rate of one-fourth to one-half pound per vine or stable manure. Strong growing vines do not need fertilizing. Keep down weeds until August with cultivation or mulch.

RHUBARB

(See page 31)

Rhubarb is highly prized for sauce and pies in the spring before other fruits and vegetables are ready. Rich soils are essential and a heavy application of manure should be made in advance of planting. An annual application of manure, or commercial fertilizer, is desirable. Use manure at the rate of 3 to 6 bushels to 100 square feet, or 10-10-10 fertilizer plus 1 pound of nitrate of soda, or one-half pound of ammonium nitrate for the same area. Plant the roots in early spring 3 to 4 inches deep and 3 feet apart in the row, and at one side of the garden as they last for many years. Clean cultivate or mulch, as vigorous growth means high yields and tender stalks. Pull only a few stalks the second year, but thereafter a full crop may be harvested for about two months each spring.

Early Rhubarb may be had by covering a hill with a sash over a box just before growth starts. Rhubarb may be forced in a box of soil in the cellar during the winter if the roots are brought in after experiencing a hard freeze.

CURRENTS and GOOSEBERRIES

(See page 28)

Currents and Gooseberries are both valuable home garden fruits that should be grown much more than at present. Both yield heavy crops annually and have many uses in the kitchen. They will grow in the sun or in the shade of the north side of a building or fence and may be successfully interplanted between young fruit trees or grape vines.

Well drained fertile soils, preferably rather heavy in texture, are best, but the lighter types will do if heavily fertilized and mulched in time of drought. They may be planted in late fall or early spring, and spaced 3 feet apart in the row. At planting time cut the canes back to 6 or 8 inches. Cultivate shallowly, or mulch to keep down weeds.

Strawy manure may be applied to a depth of 2 or 3 inches to provide fertility and act as a mulch. If manure is not available, apply about 4 ounces of nitrate of soda or 2 ounces of ammonium nitrate per plant in early spring, but not applying any the year the plants are set. On light soils a complete fertilizer may be needed in addition to the above, in which case use one-half pound of 5-10-5 formula to each plant.

Currents and Gooseberries in good vigor produce so many canes that the bushes soon become too crowded. Pruning consists of removing all canes over three years old and thinning out the weaker remaining canes so that the pruned bush consists of 9 to 10 canes evenly divided between 1, 2 and 3 year-old wood.

Currents for jelly should be picked before fully ripe as there is more pectin at that time. Gooseberries make an excellent jam and jelly and may be used green for pies and sauce when two-thirds grown.

ASPARAGUS

(See page 31)

Asparagus is an easily grown perennial that is ready to use in early spring. The beds last 15 to 20 years and should be set at one side of the garden. Set one-year-old roots 18 inches apart in a trench 4 to 6 inches deep and 4 feet apart if more than one row. Cover the roots at first with only two inches of soil, filling in gradually when cultivating. Begin cutting the third season and cut for one month. In the following years the bed may be cut for two months. Fertilize with a complete fertilizer and control weeds. If beetles feed on foliage dust wth rotenone.

BLUEBERRIES

(See page 34)

Blueberries are a valuable home garden and commercial fruit and deserve a place in every home garden with soils that are acid, or can be made acid. Clay soils are not suitable for Blueberries.

Acid Soil Required

Acid soils are essential for Blueberries. If in doubt, have the soil tested by the Farm Bureau, and if the pH is under 5.5, Blueberries may be planted. If over 5.0, spade in aluminum sulphate as follows to each 100 sq. ft. Aluminum sulphate listed on page 20.

If present pH on your soil is	To change to pH of 4.5 use: on sandy soils	On loan soils
5.0	2.4 lbs.	7.2 lbs.
5.5	4.8 lbs.	8.3 lbs.
6.0	7.2 lbs.	21.0 lbs.
6.5	9.0 lbs.	27.6 lbs.
7.0	11.4 lbs.	34.8 lbs.

Location

Blueberries grow much better and on drier sites when mulched than when cultivated. Sawdust of any kind and age is ideal mulching material, but peat and other materials except legumes, will do. Twice as much nitrogen is necessary during the first few years of a sawdust mulch.

Fertilization

Sulphate of ammonia is the best material for fertilizing Blueberries. Beginning with the second spring after planting, apply it at the rate of 2 ounces per plant, doubling this if a sawdust mulch is used. Scatter the fertilizer over the surface of the ground from one-half to three feet from the center of the bush. Increase the application two ounces each year until mature plants five or six years old are receiving three-quarters of a pound per year.

Pruning

Pruning is necessary after the third year to prevent overbearing and to maintain berry size. Remove low spreading branches near the ground, at least one old cane each year, and remove the weaker new canes, leaving two or three of the stronger to gradually renew the bushes.

A few bushes near buildings may need a cheesecloth cover to prevent birds from taking the berries.

KELLY'S GIANT HYBRID BLUEBERRIES

For Delicious Pies

Enjoy luscious, juicy, giant Blueberries right from your own bushes. These mouth-watering beauties are as big as Grapes. Delicious for pies, easy to preserve, fine for freezing. Bushes are trim and very ornamental planted in borders or beds.

Complete planting and after care instructions sent with each order.

★ CONCORD. (Early to Midseason). Excellent producer and prolific grower. Upright plant. Excellent flavor and size.

★ JERSEY. (Late.) Tall, well-shaped bush. Attractive appearance. An excellent producer. Large, good quality berry.

★ JUNE. (Early.) Liked for its early ripening; usually picked in three pickings. Fruit cluster loose, berry medium size, dark blue, firm with slight aroma.

★ RANCOCAS. (Midseason.) Popular. Ripens about 2 weeks after Cabot. The bush is tall, vigorous and productive.

★ STANLEY. (Late.) Plants tall, vigorous, with large thick, shiny leaves and very productive. Fruit large, perfumed, and most delicious in flavor. Ripens late midseason.

Blueberries Besides Furnishing the Favored Fruit for the Table, Make Delightful Shrubs in the Garden

THE GREAT NEW INTERLAKEN SEEDLESS GRAPE

A California seedless type that is hardy in the North.

Origin: The new Interlaken Seedless originated at the Agriculture Experiment Station at Geneva, New York, after 30 years of experimenting and close breeding. It was developed from crossing the Thompson Seedless, a California Grape, with our own Ontario and an excellent golden seedless Grape was developed.

Hardiness: It has proven hardy in temperature to -15° and no material harm has been noticed until after temperatures have reached a -20° or below.

Quality: The fruit is very sweet and blends with the flavors of both its parents, but is even better than the Thompson Seedless. The flesh is meaty and crisp and of excellent texture. The cluster of berries is of medium size, golden amber color and with a tangy flavor. It ripens a full month before Concord, and due to its hardiness and excellent qualities promises to become one of the leading fresh fruit Grapes here in the North. Ripens about August 30th or earlier.

Selected 2-year vines, \$1.75 each; 2 for \$3.25, postpaid.

KELLY'S HEAVY ROOTED, HARDY GRAPES

GRAPE SPECIAL COLLECTION

- 1 Steuben
1 Interlaken Seedless
Only \$2.95, postpaid

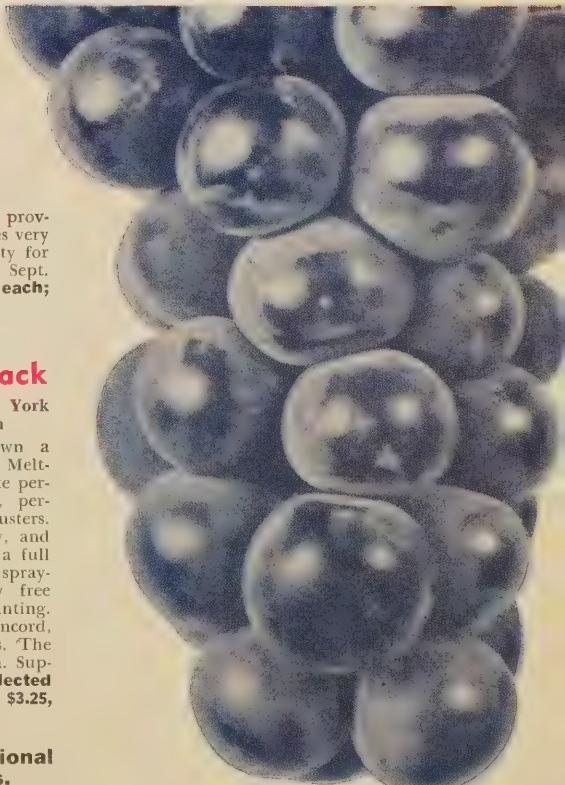

CACO (Red)

A new red Grape which is proving to be a great favorite. Berries very large and sweet. A dandy variety for home vineyard or Grape trellis. Sept. 28-Oct. 3. **Selected 2-yr., 65c each; 3 for \$1.70, postpaid.**

STEUBEN, Blue-Black

A New Creation of the New York State Experiment Station

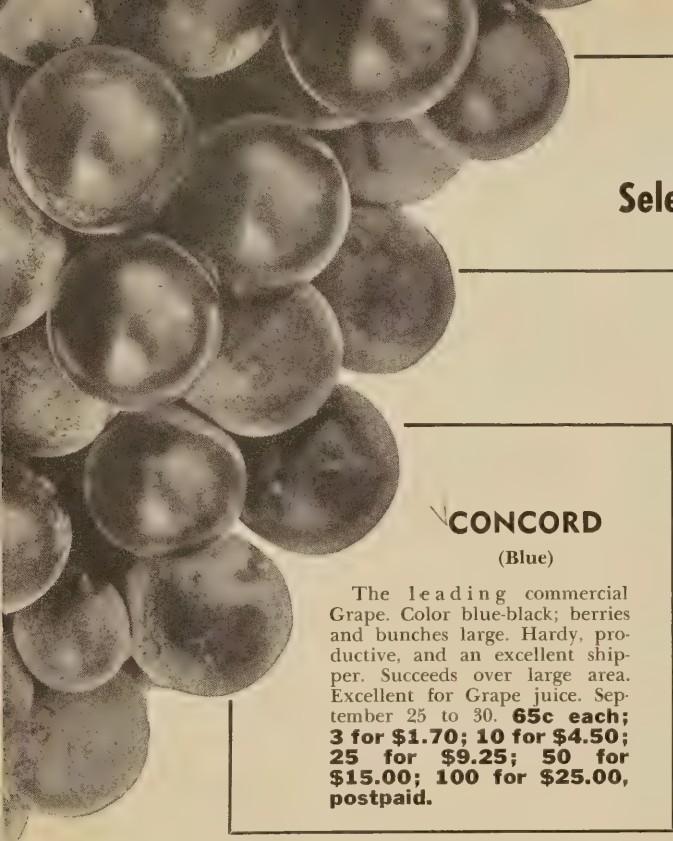

Never before have we grown a Grape of such exquisite flavor. Melting, tender, sweet with a delicate perfume-like flavor. Grows huge, perfectly formed, long slender clusters. Fruit is of outstanding quality, and the vine very hardy. Produced a full crop after 20 below zero. No spraying necessary—it is absolutely free from rot and mildew in our planting. Ripens a few days before Concord, but keeps well until Christmas. The greatest blue Grape ever grown. Supply limited—order early. **Selected 2-yr. vines: \$1.75 each; 2 for \$3.25, postpaid.**

See page 36 for additional varieties of Grapes.

GRAPES

Selected Varieties for Flavor-Size and Yield

CONCORD

(Blue)

The leading commercial Grape. Color blue-black; berries and bunches large. Hardy, productive, and an excellent shipper. Succeeds over large area. Excellent for Grape juice. September 25 to 30. **65c each; 3 for \$1.70; 10 for \$4.50; 25 for \$9.25; 50 for \$15.00; 100 for \$25.00, postpaid.**

OLD FAVORITES

DELAWARE (Red)

Bunches and berries small. Light red. Unusually sweet and delicious. One of the best red varieties. September 20. **65c each; 3 for \$1.70, postpaid.**

FREDONIA (Black) A Fine Sweet Grape

The leading early black Grape. An introduction of the New York State Experiment Station. Plant is a strong, healthy grower. Clusters medium in size. Berries large and juicy. September 5-10. **65c each; 3 for \$1.70, postpaid.**

NIAGARA (White)

The most popular white Grape. Bunches and berries extra large. Vigorous, productive and a good keeper. September 25-30. **65c each; 3 for \$1.70, postpaid.**

PORTRLAND (White)

Holds first place among Grapes as an early white variety. Vine is hardy, healthy and productive. Bunch and berries largest of all white Grapes. September 1-8. **65c each; 3 for \$1.70, postpaid.**

EASY TO CARE FOR—LAST A LIFETIME

Kelly's Grape Vines last a lifetime. Plant our selected plants. Guaranteed to be the finest plants grown. Easy to grow, adapted for a wide range of soil and climate. Prolific bearers. Fruit ideal for dessert, jelly, jam or juice. Full planting instructions with each order.

NEW EXTRA CHOICE GRAPES

BUFFALO

New, early Black Grape, ripening first week in September. Desirable for dessert and wine. Vine is a vigorous grower and very prolific. You'll like these sweet, juicy Grapes. Medium to large in size. Order a vine today. Supply limited. **Selected vines: \$1.00 each; 3 for \$2.75, postpaid.**

GOLDEN MUSCAT

California Type Grape

Wonderful new golden yellow Grape. For home use and roadside market it is one of the best. Possesses rich golden color and fine Muscat aroma of European Muscat. Vine is vigorous, productive. The clusters are very large and compact. Berries are large, juicy, sweet and tender. Oct. 5-10. **Selected, 2-yr. vines: \$1.00 each; 3 for \$2.75, postpaid.**

SENECA

You will be amazed at the taste of this delicious California Vinifera Grape. Tender skin which can be eaten with the berry make Seneca a desirable dessert Grape. Vine is vigorous, hardy and productive. Berries sweet and juicy. Ripens first week in September. **Select, 2-yr. plants: \$1.00 each; 3 for \$2.75, postpaid.**

VAN BUREN (Black)

Best new, early Grape. Desirable for home and commercial planting. Resembles Concord, but much sweeter and very juicy. Aug. 28-Sept. 2. We highly recommend this variety. Vine is heavy producer and vigorous in growth. **Selected, 2-yr. vines: \$1.00 each; 3 for \$2.85, postpaid.**

KELLY PEACHES

Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. If properly cared for the trees are sure to bring in a handsome return on your investment. Our trees are of the best quality and sure to grow.

Dates after each description indicate approximate ripening season in Western New York. Season varies in different sections of the East, but this will give you an approximate idea when to expect the fruit to be ripe.

BELLE OF GEORGIA. Large, attractive, white-fleshed Peach. Red cheek. Hardy and productive. Freestone. September 3-7.

CHAMPION. Large, creamy white, with red cheek. Excellent quality. Good shipper. Hardy and productive. Freestone. September 5-8.

J. H. HALE. An extra large Peach, yellow overlaid with crimson. Flesh golden yellow, of delicious flavor. An excellent shipper. A fine commercial variety. Prolific when cross pollinated with some other variety. All of the varieties offered in this catalog are suitable for planting with Hale. Freestone. September 17-21.

SOUTH HAVEN. Another excellent Peach, well worth planting. Golden yellow with red blush. Large, meaty and delicious flavor. Prolific. Freestone. August 25-September 1.

SULLIVAN ELBERTA. Midseason, ripening one week before Elberta. Fruits large. Similar to Elberta in all respects except earlier ripening. One of the most extensively planted varieties in the past few years, especially in the Southeast.

VALIANT. Large, yellow freestone. Juicy, very good quality. Excellent producer and fine canner. Quite hardy in bud. An introduction from Canada. August 28-September 5.

VEDETTE. Ripens a few days before Valiant and 3 weeks before Elberta. Fruit is large, roundish oval, yellow-fleshed, and a freestone. Superior quality and color. August 25-30.

VETERAN. Large, round, yellow-fleshed fruit. Freestone. Since it ripens a few days later than Valiant, it makes a desirable sort to follow that variety. Hardier in bud than most varieties. Ideal for cold sections. August 30-September 4.

PEACH ORCHARD COLLECTION

[37]

NEW PEACH VARIETIES

JERSEYLAND. Very early, ripening about 5 weeks before Elberta. Fruits medium-sized, round. Skin solid red. Flesh yellow, usually free when ripe, firm. Promising for local marketing and commercial production.

FAIRHAVEN. Early midseason, ripening after Golden Jubilee and about 3 weeks before Elberta. Flesh yellow, free. Good for freezing and canning. Promising variety for local marketing and commercial production.

SUNHIGH. (New Jersey Introduction.) Good quality. Yellow flesh. Hardy. Ripens just ahead of Goldeneast.

SUMMERCREST. (New Jersey Introduction.) Yellow freestone. Ripens just before Elberta.

POLLINATION: With the exception of **J. H. Hale**, all varieties we offer are self-fruitful.

See next page, 38, for additional listing.

KELLY'S PEACHES

KELLY'S ELBERTA

Leader of all Peaches and the greatest commercial variety on the market; 50% of the Peaches planted are Elberta. A beautiful Peach of good quality; not only the best orchard variety but also valuable for planting in the garden. Elberta is harder in bud than many varieties, therefore a more uniform cropper. It is large, yellow with red cheek, juicy, high flavor. Flesh yellow; freestone. September 15-20.

Elberta

Fowler

Red Haven

Hale-Haven

Golden Jubilee

Kelly's Hale-Haven

A marvelous Peach, result of crossing the famous J. H. Hale with South Haven. A large, beautifully colored, yellow-fleshed Peach. Ripens approximately 10 days to 2 weeks ahead of Elberta. Perfect freestone; strong grower. Good shipper, and a prolific, heavy bearer. The tree is hardy and fruit is of the highest quality. Should be in every planting. September 1-5.

The New Fowler

This new Peach, developed by Mr. George R. Fowler of Marlboro, N. Y., was awarded Patent No. 567 in 1943. It is a large, yellow Peach of the Elberta type, very hardy. Tree of vigorous growth and exceptionally disease-resistant. Fruit matures a week later than Elberta, ripening evenly. Firm, thick-skinned and an excellent shipper. Fine flavor and practically fuzzless. **For prices on Fowler add 15c per tree to our Peach tree prices on page 37.**

Kelly's Red Haven

A new, early Peach, thoroughly tested and found highly satisfactory. Introduced by the South Haven Experiment Station, it has the fine flavor of the South Haven and the Hale-Haven. When other early Peaches are still green, this Peach is a bright red and ready to ship before it is fully ripe. A Peach to plant for real profit. Hardy. Freestone. Self-pollinating and a prolific yielder. August 20-25.

Kelly's Golden Jubilee

The Sensational Peach
We recommend this New Jersey Experiment Station introduction. It's a real money maker. Quite hardy, resists excessive cold. Sure cropper, after severe winters and heavy frosts. Golden Jubilee is without equal as an early, large yellow freestone of highest quality. Flesh is yellow, tender, juicy and sweet. August 20-25.

INDIAN SUMMER

10 CHOICE, EVERBEARING PLANTS. \$2.75

New Red Raspberry introduced by the New York State Experiment Station. The summer crop ripens early in July; the autumn crop starts early in September and continues until a severe frost. Plant is hardy and a vigorous grower, bears heavy crops.

CUMBERLAND

THE LEADING LATE BLACKCAP

* Produces large, jet-black fruit, firm and of excellent quality. Starts to ripen in midseason, continuing for several weeks. Fruit is large, plump, sweet and juicy with a true "Blackcap" flavor all its own. Free from seediness and crumbling and an ideal shipper. The most popular of all black varieties wherever Blackcaps are grown. July 5-10.

KELLY'S RASPBERRIES

September NEWEST Everbearing Raspberry

Now you can plant a Raspberry that will produce an abundant crop in June and a crop of equal size in September. Fruit comes earlier and is larger, and of better quality than any other Raspberry.

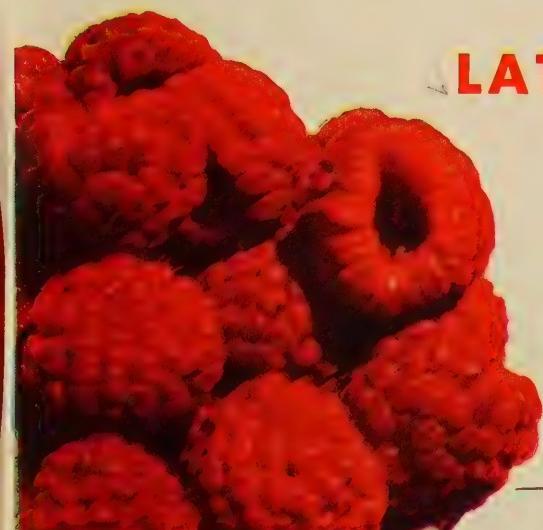

Developed and introduced by Prof. George L. Slate of the New York State Experiment Station. (See pages 32 and 33.) This station has long been known for its leadership in developing new and successful fruits.

Ripens 2 to 4 weeks ahead of other varieties in the fall. The berries are firm and don't crumble.

Order the New Raspberry Today—Our Supply is Definitely Limited.

Healthy Plants That Will Bear Bumper Crops

ALL PLANTS GUARANTEED TO GROW

KELLY RASPBERRIES

Hedrick BLACKBERRIES

Here's a new Blackberry introduced by Dr. Geo. L. Slate at the New York Experiment Station. Bound to become the country's leading Blackberry. For years the bearing habits of the standard Eldorado variety have been irregular. Plants would make excessive growth, but would be shy in the bearing of fruit. For that reason, intensive breeding work has been going on at the New York State Experiment Station to improve Blackberries. The berries are somewhat larger than Eldorado and are moderately firm, without core and of good quality. Ripens in Western New York during the latter part of July. If you have never had much success growing Blackberries, we would suggest that you try this new variety. For home use and commercial production, there is a need for good Blackberries.

The Giant MORRISON

A GIANT NEW BLACK RASPBERRY

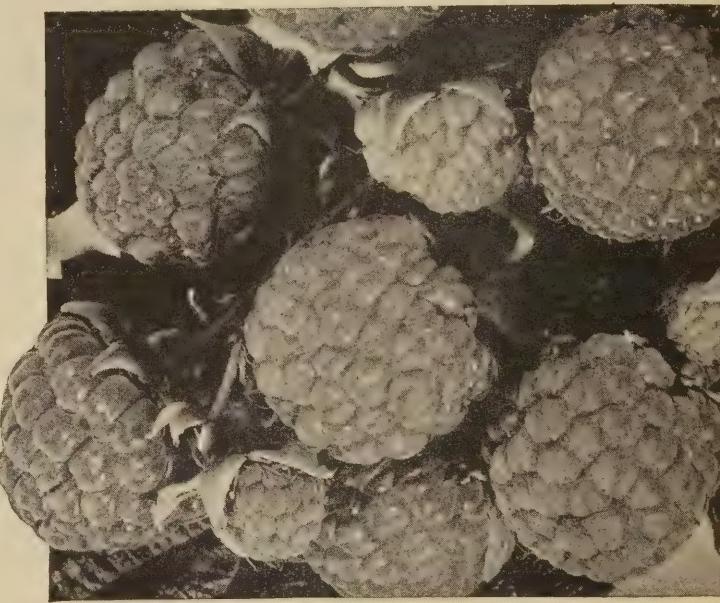

This variety, which originated in Northern Ohio, is highly praised by growers everywhere. Extremely large, shiny, jet-black berries of fine flavor and less seedy than other sorts; excellent for market and home use. The strong, vigorous vines are very productive and free from disease and very long lived. Recommend this variety without reservation to those who want the best black Raspberry.

The Productive SODUS (PURPLE)

The leading purple Raspberry. Recently introduced by the New York State Experiment Station. Berries are very large, firm, sprightly and good in quality. The plants are very vigorous, very productive, and hardy. More resistant to drought than the old Columbian and yields good crop every year; it ripens shortly after Latham. July 10-12.

The New MILTON

A late variety for market and home use. The berries are large, long conic, resembling those of the Taylor in size and shape. They are attractive bright red, firm, not crumpling, mild sub-acid and good. It ripens 2 or 3 days later than Taylor and Latham. The plants are vigorous, productive and hardy. Milton has remained free from mosaic, in a test planting, in the Hudson Valley, where numerous other varieties soon became infected. This freedom from mosaic is an important reason why the seedling was named and introduced for more extensive testing by growers.

COMPLETE SPRINKLER

Includes nozzle, copper tubing and hose connection at base. Runs through bed and out under bottom band to connect with garden hose.

RED RICH

Strawberry

The Champion of All Everbearing Strawberries

Plant Patent No. 993

Here at last is the Strawberry that's a real sensation. A one-in-a-million chance seedling. Enjoys all the finest qualities known to Strawberry plants. **READ WHAT UNIVERSITY REPORT SAYS:** Quote: "Of the 29 everbearing varieties tested here last season Red Rich is by far the best. I think it is the everbearer for which we have been waiting. (Signed) Herschel L. Boll, Assistant in Pomology, Agriculture Dept., University of Illinois."

BEARS ALL SUMMER—gives you luscious, honey-sweet Strawberries all summer long throughout the fall until winter freeze.

MAMMOTH PLANTS—HUGE BERRIES, we've never seen plants so big and strong. This means disease resistant strength and enormous yields.

PLANT BY NEW METHOD, WONDERFUL YIELDS. Each Red Rich plant shipment carries new "Space System" planting instructions. Follow carefully and get up to a pint per plant the first year and up to a quart per plant the second. Fewer plants needed—25 plants per person is plenty.

TOPS FOR FREEZING. Slice one. They're red clear through. Plenty of natural sugar and a firm texture that holds shape when thawed. Wonderful winter desserts.

Gem

TWO IDEAL SHADE TREES FOR LAWN OR STREET PLANTING

SENSATIONAL MORAINE LOCUST

(Plant Pat. No. 836)

Fast Growing Shade Tree

It gives us great pleasure to offer this sensational, new shade tree, because we believe the Moraine Locust so perfectly fills the needs of today. For the many new homes which have no shade trees whatever, it will provide good shade quicker than any tree we know of, and is superior in many ways to other fast growing trees, and it is easy to transplant.

Grows Anywhere — Long-Lived — Seedless

The Moraine Locust is a hardy, drought-resistant tree that grows successfully on a wide range of soils. It will withstand the same extremes in temperatures as the common Honey Locust and is as long-lived. Because the Moraine Locust is sterile, there are no unsightly seed pods to clutter up the lawn, non-fruiting habit also makes for better foliage.

Beneficial to Lawns

The Moraine Locust forms a large, beautifully shaped head, similar in appearance to the American Elm. The finely cut foliage allows enough light to filter through to promote excellent growth of lawns, yet provides shade dense enough to discourage growth of crab grass. Whether your need is for good shade quickly, or to replace undesirable trees, we believe you will agree the Moraine Locust is the answer. Try a planting this spring. **5-6 ft., \$6.00 each.**

NORWAY MAPLE

The Best All Around Shade Tree

Recognized as the finest shade tree for generations. Rich indeed is the city whose inhabitants plant Norway Maple as a permanent street tree.

Foliage Dense — Rich in Color

Its dense leaves are a rich green color, and hold on the tree longer in the fall than most Maples, without much change in color.

Good For Specimen Plantings

A good tree for street or lawn specimen plantings, where good form and shade are needed. Reaches a height of 30-50 ft. Is resistant to storm, very clean in habit, and the leaves will withstand smoke, soot and attacks from insects.

Each

4-5 ft.	\$3.50
6-8 ft.	4.50

KELLY BROS. NURSERIES, INC.

Dansville, N.Y.

EVERGREENS FOR PERMANENCY

GLOBE ARBOR-VITAE

A natural globe-shaped evergreen. Has broad fan-shaped leaflets. It is dwarf in its habit of growth, usually not growing over 3 feet tall or 3 feet in diameter. Fine for doorway and foundation planting or for formal designs, tubs and urns. **8-10 in., heavy transplants, \$1.50 each; 2 for \$2.90, postpaid.**

SPREADING PFITZER'S JUNIPER

This evergreen naturally grows in a low, wide spreading habit. It will stand considerable shade and crowding, which makes it a favorite for foundation and informal plantings. If kept untrimmed, will spread 4 to 5 feet. Can be kept low to the ground by trimming. **10-15 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS CUSPIDATA NANA

(*Brevifolia*)

Dwarf Japanese Yew

Rarely over 5-foot spread and 4-foot height. One of the best dwarf evergreens. Thick, dark green foliage. Slow growing. Makes excellent hedge, requiring very little shearing. **8-12 in. transplants, \$1.75 each; 2 for \$3.25, postpaid.**

Pyramidal Arbor-Vitae

On account of its rapid growth, its bright green color, its shapely even pyramidal habit and ease of trimming, this evergreen ranks among the leading ones for the Eastern United States. Will grow 15 feet tall but seldom over 2 feet in diameter. May be freely cut and trimmed and thereby kept within any bounds necessary. **12-18 in., heavy transplants, \$2.00 each; 2 for \$3.90, postpaid.**

SPREADING JAPANESE YEW, TAXUS CUSPIDATA

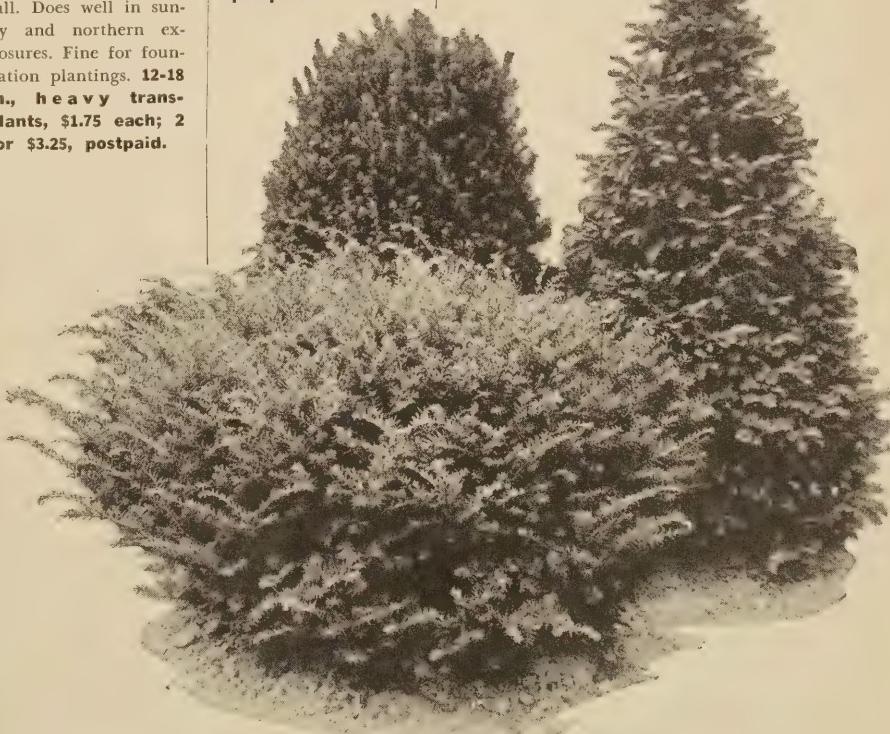

This evergreen usually grows more wide than tall. Branches out from the bottom with several stems, developing into a bush form. Rich, dark green foliage with numerous crimson berries in the fall. Does well in sunny and northern exposures. Fine for foundation plantings. **12-18 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

HICKS' YEW TAXUS HICKSI

A narrow, upright Taxus with vertical branches. Can be kept trimmed to a desired shape and height. It has rich, dark, glossy green color, making it very popular. Tree resistant to extremes of heat and drought. **12-18 in., heavy transplants, \$1.75 each; 2 for \$3.25, postpaid.**

TAXUS CUSPIDATA

(Upright Japanese Yew.) The normal habit of this Yew is a pyramidal form, broad at the base and tapering to the top of the tree. A rapid growing tree, so can be trimmed back at least twice during the summer. **15-24 in. transplants, \$2.50 each; 2 for \$4.75, postpaid.**

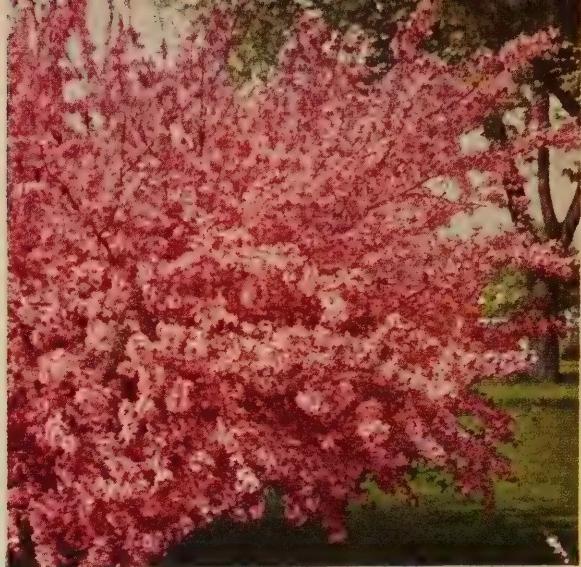

WISCONSIN WEEPING WILLOW

There are few trees that can be used to such advantage for cheery winter effects. Grows fast, adapted to a variety of soils and uses. Is very hardy, and beautifully effective near pools, along drives and on lawns. Grows 25 to 30 feet tall.

	Each	3 for	5 for	10 for
4-5 ft.	\$1.50	\$3.50	\$6.00	\$9.00
5-6 ft.	2.00	5.50	8.50	14.00
6-8 ft.	2.50	6.50	11.00	19.00

RED-FLOWERING CRAB

(*Malus Floribunda*)

This small tree is round-topped with single, carmine buds that change to pink and then white. Very heavy bloomer with small blood-red fruits, which can be used for jells. Will stand severe winters and drought. 15 to 20 feet at maturity. **4-5 ft., \$2.50; 2 for \$4.75, postpaid.**

BEAUTY AND GRACE FOR YOUR

ROSE TREE of CHINA

(*Prunus Triloba*)

Branches are hidden under a fleecy cloud of bright pink double blossoms resembling small pink Roses, even before leaves are out in the spring. A breathtaking sight in full bloom, especially when it reaches full height of about 4 to 6 feet. Should be included in every yard. Very hardy and easy to grow.

	Each	3 for
2-3 ft.	\$2.00	\$5.75
3-4 ft.	2.50	7.00
Postpaid		

RED JAPANESE MAPLE

Grows no taller than 8 to 10 feet. Leaves a startling crimson all summer. Makes an excellent specimen for side yard or in formal garden. Has best color when in full sun, but will tolerate moderate shade. Trees moss balled. **1-1½ ft., \$6.50, postpaid.**

SPECIAL OFFER
1 Eleyi Crab
1 Tree Wisteria
\$6.95, Postpaid

TREE WISTERIA

No more lovely sight can be imagined than a Tree Wisteria in bloom. The purplish blue flowers completely cover the tree during May, transforming it into a sheer beauty. On the lawn they develop into beautiful specimens, increasing in beauty and dignity each successive season. Can be kept trimmed to a height of 6 to 8 feet.

Grafted, Sure-to-Bloom, Balled in Peat, 3-4 ft., \$4.95 each, postpaid.

GOLDEN CHAIN TREE

No picture can do justice to this rare, low growing tree. Its long clusters of pure golden yellow are similar in form to the well known Wisteria, and often reach 18 inches in length, as many as 6 or 8 clusters on a small twig. Does well in either partial shade or full sun. A show plant all season, with its decorative green bark and large, clover-like leaves. **4-5 ft., \$4.75 each, postpaid.**

CHINESE ELM

A very rapid grower, growing to a height of 30 to 40 ft., with small dense foliage. Excellent for tall hedge or windbreak. Makes remarkable shade in five short years. A wide spreading tree with slender limbs and drooping twigs. **6-8 ft., \$3.25 each. 5-6 ft., \$2.75 each.**

European MOUNTAIN ASH

Much more satisfactory than the native species, since it fruits more prolifically and has more compact habit. Large flat clusters of white flowers in the spring. Clusters of flashy, orange-red berries all over the tree in summer and fall. Deep green, clean foliage perfectly implements the graceful, upright habit. Grows to a height of 18 to 25 ft. with a spread of 15 ft. maximum. **5-6 ft., \$4.00 each. 4-5 ft., \$3.50 each.**

LAWN

ELEYI PURPLE LEAF CRAB

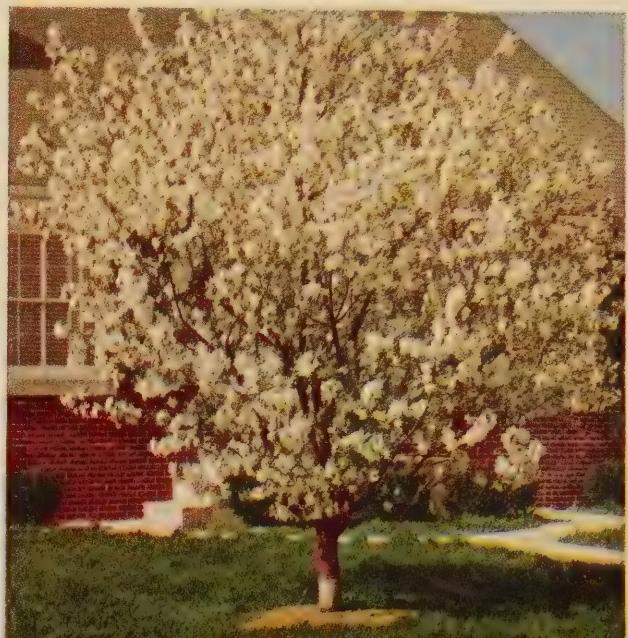

The tree is hidden in the spring by masses of wine-red blossoms. An outstanding specimen, with handsome bronze foliage turning to bright red in the fall. Attractive deep red fruits persist into the winter. The fruit makes a brilliant distinctive jelly. Tree grows to about 10 to 12 ft. tall and makes an ideal ornamental lawn tree. **4-5 ft., \$2.50 each; 2 for \$4.75, postpaid.**

[47]

Kelly's Famous White Flowering CRAB TREE

This is undoubtedly the most beautiful Flowering Crab that can be grown in the North successfully. It is an upright tree, covered with beautiful white flowers which last a long time, followed by red-skinned fruit with white flesh throughout, and lingers until fall. The fruit is excellent for canning or jellies. Tree is very hardy and disease free. Outstanding sensation for single or group planting. **3-4 ft., \$2.00 each, postpaid.**

SILVER MAPLE

Most rapid grower of all Maples. A large, spreading tree which, at maturity, has a height from 60 to 70 feet. A cut leaf with a silvery cast, and also a silvery bark. Sap is good for sugar making.

4- 5 ft.	\$2.25
5- 6 ft.	2.75
6- 8 ft.	3.25
8-10 ft.	4.25

North Bangor, N. Y.

Oct. 14, 1953

Kelly Brothers Nurseries, Inc.
Dansville, N. Y.

Gentlemen:

As you know, I have purchased nursery stock from Kelly Bros. for several years, and from many other companies as well.

I have been continually adding fruit trees, berries, etc., each year.

The results from Kelly's stock have been far superior to any other I have planted. I am satisfied that Kelly's quality can't be beaten. Next year I will send you more pictures including 24 of your Blueberries which have done very well.

Very truly yours,
Wade A. Hastings, M. D.

GINKGO

Has great vigor, growing from 40 to 60 feet high. In form, it varies from tightly pyramidal to wide-spread irregularity. It is always fresh and green, and in autumn a cloud of gold. The leaves of this tree are fan-shaped and the branches are nearly parallel. Does well in any soil. A very picturesque tree. **5 to 6 ft., \$4.50.**

KELLY'S POPULAR SHADE TREES FOR

ORIENTAL PLANE TREE

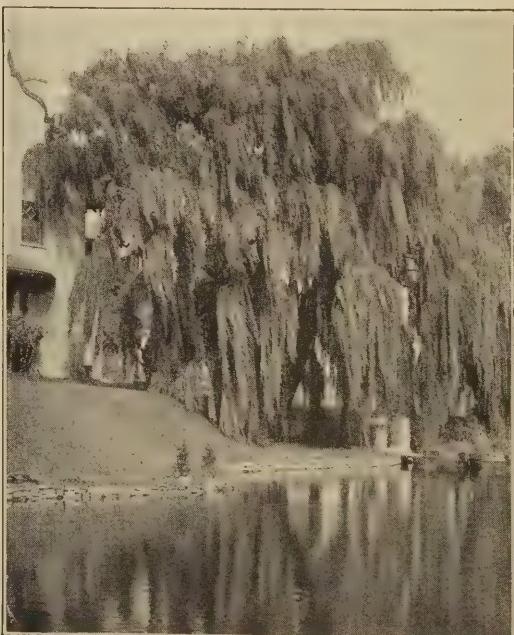

An excellent tree for either shade or street planting. A large tree when mature growing 40-50 ft high. The leaves are broad growing, 5-10 in. wide, and having a tendency to be rather heart shaped. Dense growing, thus making excellent shade. Recommended where adverse growing conditions exist.

5-6 ft.	\$2.50
6-8 ft.	3.00

NIOBE WEEPING WILLOW Golden Yellow Bark

A graceful weeping tree for lawn or beside a rock wall, for planting near pools, banks or streams. Has golden yellow bark, narrow green leaves, silvery beneath, and long, drooping branches. **4-5 ft., \$2.00 each; 2 for \$3.75. 5-6 ft., \$2.25 each; 2 for \$4.25. 6-8 ft., \$2.75 each; 2 for \$5.00.**

SCHWEDLER MAPLE

This is a beautiful tree in all seasons. In the spring, the foliage is a reddish purple, followed by a bronzy green color in the summer. It is very attractive in the fall when its foliage is a golden yellow. Recommended for specimen planting in lawns. Symmetrical in growth. Not fast growing. **6-8 ft., \$5.50.**

Stately PIN OAK

For an artistic, attractive shade tree, it is one of the fastest growing of the Oak family. The foliage is rich green, deeply cut, glossy copper in late fall. Generally disease and insect free. At maturity stands 30 to 40 ft. Grows in a symmetrical pyramidal form. **4-6 ft., \$5.50 each; 5-7 ft., \$6.00 each.**

LAWN AND STREET PLANTING

SUGAR MAPLE

(Hard Maple). This is the tree that has such beautiful scarlet, orange and yellow foliage in the fall. It is a native to many sections and is the source of the delectable Maple Sugar. Develops into one of the grandest of all trees. **6 to 8 ft., \$5.50.**

LOMBARDY POPLAR

Good for Wind Screens

Tall, fast growing, spire-like tree. Adapted to wide range of soils. Everybody knows the striking appearance of this tall, narrow-growing tree, like a church spire. Ideal for screening, wind-breaks and backgrounds. When used for these purposes, plant 5 to 6 feet apart. **3-4 ft., 50c each; 10 for \$4.50; 100 for \$30.00. 4-5 ft., 65c each; 10 for \$5.50; 100 for \$40.00. 5-6 ft., \$1.00 each; 10 for \$7.50; 100 for \$50.00. 6-8 ft., \$1.25 each; 10 for \$9.95; 100 for \$65.00.**

MAGNOLIA SOULANGEANA

Fragrant, huge, tulip-shaped flowers in early spring, rosy white inside, lively rose color outside. Leathery, deep green, waxy foliage follows the flowers, providing a restful mass of cool green for the summer. Makes an upright rounded tree growing to 12 to 14 feet. A magnificent lawn specimen, doing well in any soil having good drainage.

18-24 in., \$3.50; 2-3 ft., \$4.95; 3-4 ft., \$6.00, postpaid.

RUBY TREE

Prunus Pissardi

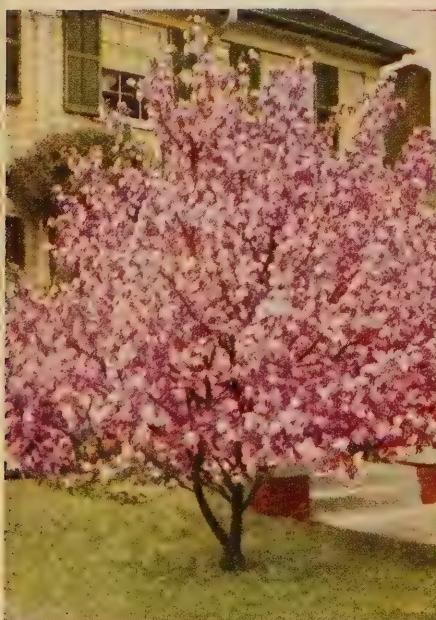

Leaves are purple and more lasting than many purple-leaf plants. Grows approximately 10 feet high and gives excellent foliage contrast in a shrub border.

3-4 ft., \$1.75 each; 4-5 ft., \$2.25, postpaid.

COLORFUL LAWN TREES

Bechtel's DOUBLE FLOWERING CRAB.

Huge, double, light pink flowers hide the branches with rare beauty in the spring. Ideal for smaller lawn. Formal type; broad-symmetrical, pyramidical style. Distinct lobed leaves. **2-3 ft., \$2.00; 3 to 4 ft., \$2.75, postpaid.**

KWANZAN FLOWERING CHERRY.

Spectacular Flowering Cherries of Washington Tidal Basin, this one superb variety is always the most impressive. Trees bloom a year or two after transplanting. Grows 20-30 ft. tall. Double, bright rose-pink flowers completely clothe the branches in early spring. **3-4 ft., \$3.25, postpaid.**

RIVERS' PURPLE-LEAVED BEECH.

One of the most colorful and beautiful of all trees and a mature specimen is one of the most valuable of all sorts. It is easily grown and long-lived. Leaves come out a deep maroon in the spring, turn gradually to a dark maroon-purple in summer, and in fall a rich purple-brown. Shapely in growth, rich in color, it will add that final touch of elegance to your lawn. Be sure to plant this variety as it is known to man to be one of the finest and best trees. **2-3 ft. grafted trees, \$3.50 each, postpaid.**

Double White-Flowering Dogwood (*Cornus Florida*)

Has all the charm, artistry, and adaptability of the popular White Dogwood, and in addition bears double flowers. Very hardy and heavy-flowering. A small tree which grows in shade or sun and in ordinary soils, even in somewhat wet places. Typical bright red berries and red fall foliage. **3-4 ft. trees, \$2.50, postpaid.**

RED FLOWERING DOGWOOD (*Cornus Florida Rubra*)

Grows to a 12-ft. tree. Everyone knows this lovely artistic tree. Produces a great profusion of large rose-red flowers in the spring; glossy red berries in the fall. A most adaptable tree; adds greatly to any landscape picture because of its fall fruit, red fall color and unique branching habit. **18-24 in., \$3.00; 2-3 ft., \$3.75, postpaid.**

PAUL'S SCARLET HAWTHORN. Lovely small tree, growing about 15 ft. tall, with spreading branches. The leaves are broad, flowers a brilliant rosy red, double, in large clusters and produced in immense quantities. The fruits are scarlet. Well suited for the small yard. **4-5 ft., \$3.50, postpaid.**

REDBUD (Judas Tree)

Live pink flowers cover every twig and branch, producing a breath-taking display early in the spring. Makes a very graceful 20-ft. tree. Large, healthy, heart-shaped leaves add a tropical cast to the landscape picture. A beautiful specimen even in the smallest yard. **3-4 ft., \$2.00, postpaid.**

WHITE CLUMP BIRCH

In naturalization, or as a lawn specimen, this lovely, multiple-stemmed tree is most effective. The white bark of its 3 or more trunks adds great charm to the landscape picture. Growth is gracefully upright, with horizontal branches. Reaches a height of 35 feet. **3-4 ft., \$3.00, postpaid.**

CUT LEAF WEEPING BIRCH. Graceful, weeping branches, finely cut foliage and shimmering white bark, make this one of the most beautiful trees. Although not particular as to soil, the Cut Leaf Weeping Birch prefers a moist location and a sunny spot. Grows to 35 ft. in height. **4-5 ft., \$3.50, postpaid.**

TREE HYDRANGEA. Large, pyramidal trusses of pure snow-white blossoms appear in early August. As fall approaches, they change to a luminous pink. At this stage they may be cut for all winter, dry bouquets. Blossoms measure a foot long and 6 to 8 inches wide. A low growing tree, standing not more than 4 to 6 feet in height. **2-3 ft., \$2.50; 3-4 ft., \$3.00, postpaid.**

KELLY'S FINE HARDY GARDEN LILIES

REGAL LILY. One of the hardiest Lilies in cultivation. Stems grow 4 to 5 feet high on which are produced gorgeous large white flowers, the center of which is flushed with yellow, shading to brown on the "ribs." The almost transparent petals have a delightful pearly tint. The Regal Lily when rightly established will produce from 15 to 20 flowers each year. **50c each; 4 for \$1.75; 8 for \$3.45, postpaid.**

A TRUE PINK LILY (Lilium speciosum rubrum). Wonderfully beautiful and perfectly hardy. Heads of 10 or more delicately fragrant, rose-pink blooms daintily dotted with crimson, on 3 to 4-foot plants. Excellent in the garden and for bouquets or corsages. Blooms in August. **75c each; 4 for \$2.85; 8 for \$5.45, postpaid.**

THE GARDEN EASTER LILY (Estate Lily). The same lovely, pure white flowers, rich green foliage, and delightful fragrance in the August garden that is so familiar at the Easter season. Hardy, too. 2½ ft. **75c each; 4 for \$2.85; 8 for \$5.45, postpaid.**

NEW FIRE KING LILY

The most beautiful true fiery red Lily we have ever seen. A tremendous number of large out-facing blooms flecked with black dots open over a period of 3 weeks during June and July. A clump of Fire King in bloom can be seen for a great distance. Plants with somewhat flattened wiry stems grow 3 to 4 feet. As many as 60 to 80 blooms per stem is not uncommon on established plants. A Dutch gardener noticed this new Lily in his bulb beds and later named it Fire King to describe its color. Blooming size bulbs, **\$1.00 each; 3 for \$2.85, prepaid.**

TWO INTERESTING HOUSE PLANTS

American Wonder Lemon

AMERICAN WONDER LEMON

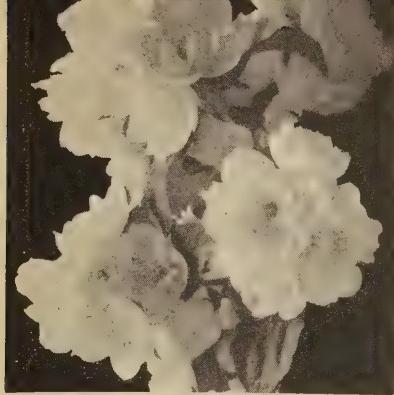

A New House Plant You'll Surely Want

Covered with waxy white flowers. Several times each year, this attractive **HOUSE PLANT** will produce Lemons, sometimes weighing as much as a pound. Known as Ponderosa Lemon, this plant is different than any you have ever grown. **2-yr. fruiting size, \$1.65 each; 2 for \$3.00. 1-yr., \$1.00 each; 2 for \$1.85, postpaid.**

GARDENIA

The thick glossy foliage surrounding the creamy white blossoms of the familiar Gardenia make this dwarf shrub a prize addition to your terrace or sun room. Grow it in pots and enjoy its exotic beauty all year, inside or out. Unequaled for its rich perfume. Very strong plants. **2-yr., flowering size, \$1.25 each; 2 for \$2.25. 1-yr., \$1.00 each; 2 for \$1.85, postpaid.**

Philadelphus, Belle Etoile

Fragrant Star Mock Orange

One of the finest and choicest of the Mock Oranges. Originated in France. Its star-like flowers open in lilac-like fashion, the center showing a delicate light purplish flush. Its intense and delightful fragrance can be detected over the entire garden. Will grow about 5 ft. in height and about 4 ft. in diameter, but can be trimmed smaller. We highly recommend this plant to you. **\$2.00 each; 2 for \$3.75.**

BLEEDING HEART

(Dicentra)

A well known favorite to all. May be used as borders, specimen plants or indoor growing. Produces pink heart-shaped flowers during May, June and July. Will do well in any well drained soil but prefers a sunny location to shade. **75c each; 3 for \$2.00.**

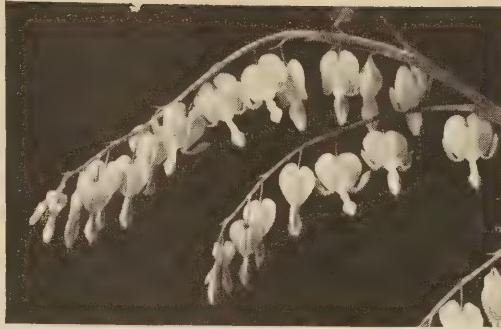

RED TWIG DOGWOOD

(Cornus alba sibirica)

Brings Fragrance and Color to Every Home Garden

A spreading shrub with bright red bark in the winter, which adds a burst of color to your shrubbery in the winter. In summer it has bright green foliage; creamy white flowers in the spring, followed by whitish berries. Grows 6 to 7 feet tall.

**18-24 in., 95c each 3 for \$2.70.
2-3 ft., \$1.15 each; 3 for \$3.25.**

Bleeding Heart

Nancy Agnes Kelly

Pink Bells of WEIGELA ROSEA

June and July finds this perfectly formed, well-rounded shrub a mass of light pink blossoms, which possess a great depth of color. Under favorable conditions it will continue to blossom until stopped by frost. The average ultimate height is 4 to 6 ft. **18-24 in., 95c each; 3 for \$2.70.
2-3 ft., \$1.15 each; 3 for \$3.25.**

ROSA RUGOSA

The rich green foliage of this plant, which ultimately grows 4 to 6 ft., is most attractive. Everblooming in its nature, large pink flowers are produced from June until September. It is unique that the large red fruits are ripening at the same time that the plant is blooming. Very hardy. It is recommended for areas near salt water.

Each	2 for
18-24 in.	\$1.00 \$1.75
2- 3 ft.	1.25 2.25

ALTHEA, WOODBRIDGE

Rose of Sharon

This attractive plant makes a good companion to the Althea Coelestis shown on page 2. The gorgeous rose-pink color of the very large flaring flowers adds real color to your garden. The best and most brilliant of Pink Altheas. Its profusion of blooms is outstanding. **\$1.50 each; 2 for \$2.75.**

Climbing Blaze

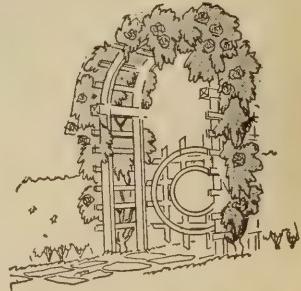

BLAZE. (Red.) Plant Patent No. 10. Grows in true pillar form. Blooms early, followed by repeat blooms throughout the summer and fall seasons. Plants hardy, bright green foliage and sturdy canes. Color is intermediate scarlet and does not fade readily. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

PAUL'S SCARLET CLIMBER. Midseason. Vivid scarlet and marvelously attractive, with a great mass of bloom. The colorful show keeps up for weeks. The brilliant color does not burn or fade and the bloom in June is profuse, in great clusters all over the plant. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CLIMBING SNOWBIRD. A small to medium sized climbing Rose, but one that is a real asset to any Rose garden. Almost never is it without exquisite, long, flaring, white buds and snowy, many-petaled, high-centered flowers. Our guess is that it will outbloom any other white Rose in your garden by at least two to one. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

CLIMBING AMERICAN BEAUTY.

Has been a national favorite in the Rose garden for over two decades. A very fragrant, very beautiful rosy carmine variety that heaps and piles its blooms all over your trellis, porch or fence. Large brilliant flowers. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

HEAVY FLOWERING CLIMBING ROSES

CRIMSON GLORY. Plant Patent No. 736. Imagine the magnificent Crimson Glory in the form of a Climber! The rich crimson color, the fascinating fragrance, the perfectly formed blooms and all the vigor and profusion that makes this Rose outstanding in its Hybrid Tea form, have been captured in this amazing Climber. Large, high-centered crimson Roses on strong stems cover the plant for a long period. **\$2.00 each; 3 for \$5.25, postpaid.**

NEW DAWN. (Pink.) Perfect Hybrid-Tea-like blooms all season of Apple-blossom-pink, and a delicate appealing old rose fragrance. Superb for use in bouquets and arrangements. Fine long stems. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

Climbing Snowbird

CLIMBING PEACE. Plant Patent No. 932. Peace is now a top favorite with Rose growers everywhere. This new climbing sport has the same fine foliage and strong stems and will give you the same huge perfectly formed flowers as the ever popular Hybrid Tea. The full ovoid bud is deep yellow with the edges of the petals picoteed cerise. It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white, and Apple blossom. **\$2.50 each; 3 for \$6.60, postpaid.**

GOLDEN CLIMBER. Climbing form of the beautiful Tea Rose "Golden Charm." We recommend this to those of you who want a golden yellow climber to complete your color range. Vigorous grower and blooms resemble those of the Hybrid Tea. May be cut in bud and keep well as blooms open. Buds are deep yellow opening into lighter yellow petals. Fragrant. **\$1.35 each; 3 for \$3.85; 6 for \$7.25, postpaid.**

LONGCLUSTER PURPLE WISTERIA

Heavy clusters of purple blooms look like giant bunches of purple Grapes hanging from the vine. Blooms in May and June. Grafted plants. Sure to bloom. **\$1.50 each; 2 for \$2.75, postpaid.**

BITTERSWEET

(*Celastrus scandens*)

An old-fashioned winter bouquet variety. Common on the public markets around Thanksgiving time. Large clusters of orange and crimson berries are in great demand. **75c each; 3 for \$2.00, postpaid.**

SILVERLACE VINE

(Fleece Flower)

The delicate fleece-like flower resembles the finest white lace. Blooms heavily from midsummer until fall. Grows about 2 feet the first season. **\$1.15 each; 2 for \$2.25, postpaid.**

KELLY'S CLIMBING VINES

TRUMPET VINE

(*Bignonia Radicans*)

An old favorite that will stand most severe climatic conditions. Clings to any rough surface. Long trumpet-shaped, brilliant orange-red. **75c each; 3 for \$2.00, postpaid.**

DUTCHMAN'S PIPE

(Not Illustrated)

(*Aristolochia Siphon*)

The curious brownish pipe-shaped flowers are a delight to children, and the large heart-shaped leaves make a dense screen. Few vines are better adapted to porches or pergolas. Grafted plants. **\$1.75 each, postpaid.**

BOSTON IVY VINE

A vigorous climber that seems to thrive even under smoky city conditions. Bears a rich mass of dark green foliage. It will cling to almost any surface and its rich autumn color makes it most desirable for planting. **95c each; 3 for \$2.75, postpaid.**

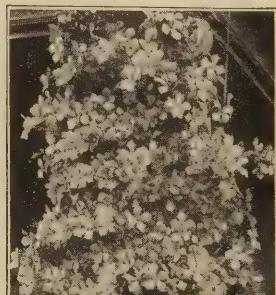

THE LARGE FLOWERING CLEMATIS

JACKMANI. Rapid grower. Large, single, purple flower. **\$1.25 each; 2 for \$2.25, postpaid.**

MME. EDOUARD ANDRE. Velvety red color. From July to September. **\$1.25 each; 2 for \$2.25, postpaid.**

CLEMATIS PANICULATA. Fine white flowers. **95c each; 3 for \$2.75, postpaid.**

The Living Fence

ROSA MULTIFLORA

**Controls Erosion • Provides Wild Life Refuge
Adds Beauty to the Landscape**

Rosa Multiflora is nothing new. It is the understock or root on which named Rose varieties are budded. Originally it was imported from Japan. It has come into prominence as a result of work done by the U. S. Department of Agriculture on erosion control in the western states. Because of its fast growth and hardiness, it has also been used on large farms and estates for fences. Extensive advertising taking advantage of the name Rose, has brought the plant into big demand as a hedge for small properties. We grow the plant and want to sell it, but are zealous in our obligation to our customers in stating that we can't recommend Rosa Multiflora for small lots. We will gladly sell it to you if you want to try, but we would not want you to be led astray by the glamorous claims that have been made for it.

Facts About the Rosa Multiflora and Its Growth

1. Can be planted 1 foot apart. Its thorns will keep children and animals of all kinds in bounds.
2. Produces dense growth—white blossoms in June—red berries in late summer and fall.
3. Extremely hardy—does well in most all soils.
4. Extensive pruning during the growing season required to keep the hedge small.
5. Grows 8 feet or more in height and 6 to 8 feet in width if not kept trimmed.
6. The red berries will attract birds of all kinds, including pheasants and grouse.
7. Grows 2 to 3 feet in one season.
8. Ideal as a ground cover on steep banks and slopes.
9. Plant just as you would any other shrub.

10. Requires no special care. Not subject to any serious disease or insect attacks.

For a good thick hedge, the plants should be trimmed back to 6 or 8 inches to promote thick growth. You can, therefore, see there is no advantage in planting larger size plants than we offer.

PROVIDE A NATURAL EFFECT WHERE GRASS WILL NOT GROW

PACHYSANDRA TERMINALIS

(Japanese Spurge)

EVERGREEN GROUND COVER

The most popular of evergreen ground covers. It spreads rapidly, giving a finished look to an underplanting. Since it thrives in the shade, it is especially useful under dense shade trees where grass will not survive. Also good for steep bank where mowing is difficult. Very useful as a combined ground cover and root protector when planted under Rhododendrons, Azaleas, and Laurels. Pachysandra puts the finishing touch to a foundation planting. Plant four or more to one square foot. **50 for \$4.50; 100 for \$8.00; 250 for \$17.50; 500 for \$32.50; 1000 for \$59.95, postpaid.**

HALL'S HONEYSUCKLE VINE

**"For That Stubborn Spot, Beautify
With a Ground Cover"**

White and gold trumpet flowers are very fragrant and remain during the entire summer. Attracts bees and humming birds. The foliage remains green in winter with some protection. Excellent cover for steep banks. Will climb on trellis or tree. Fruit is yellow; very showy in winter against green leaves. Often grows to a length of 10 to 15 feet. Plant about 3 ft. apart in staggered rows for ground cover. **75c each; 3 for \$2.10; 10 for \$6.50; 25 for \$14.95; 50 for \$24.95, postpaid.**

Tuberous Rooted Begonias

Low Growing—Large Waxy Flowering
Add a Wealth of Color to Your Garden

Imported from Belgium, these bulbs put forth double camellia-like blooms from early summer 'til frost. Just right for that shady spot. Can be grown indoors also.

We offer them in eight colors: Crimson, Scarlet, Pink, Orange, White, Yellow, Copper, Salmon.

Recommended for Northern Exposures.

All of the Gladiolus shown on this page are prize winners at the shows.

It is impossible to illustrate either the size of blossom or height of stem on this page. The fine range of color is simply beautiful. If you want a real thrill, then treat yourself to one or two collections . . . you'll never forget the satisfaction they will give at so low a cost.

Stoplight

Snow Princess

Tivoli

Beautiful Colors on Stately Stalks

Our Gladiolus bulbs are guaranteed to bloom and please you in every way. We offer a large size bulb that will measure $1\frac{1}{4}$ to $1\frac{1}{2}$ inches across. Plant 4 to 6 inches deep and 3 to 6 inches apart in a row. Be sure to give them plenty of water before and during the blooming season. Great care is taken in selecting the varieties, and we list only the better, finer kinds.

RED

Burma. A rosy deep red, shading to a lighter throat.
John Van Konynenberg. A dazzling, exquisite red eye catcher.
Mansoor. A very deep oxblood-red.
Top Score. One of the best brilliant reds of all time.
Valerie. Develops extra long spikes of scarlet-red.
Van Tiesshoven. A clear red which fits well in any bouquet.

CREAM

Leading Lady. A Picardy sport of creamy white with no other markings.
Odette Samson. A dark cream gradually growing lighter as it opens.

LAVENDER

Wedgewood. A beautiful ruffled lavender with a cream throat. One of the most beautiful Gladiolus grown.

YELLOW

Gold Dust. A deep yellow that is suitable for exhibition and commercial purposes.
Hopman's Glory. A sunflower-yellow, somewhat ruffled.
Rising Sun. A bright morning sun color and a vigorous grower.
Yellow Harold. Amber-yellow with wide open and finely ruffled blossoms.

PINK

Leeuwenhorst. Large heads of pink blossoms which are lightly tinted with lavender.
Pandora. Geranium-pink with a darker throat.
8 and 10 blossoms open at a time.
Spic and Span. A large ruffled pink which will grow huge flowers from small bulbs.
Tivoli. A clear rose-pink, individually beautiful as well as in groups.

VIOLET and BLUE

Ravel. Violet-blue with reddish brown markings. Grows on a straight tall stem.

WHITE

June Bells. A pure white excellent for cutting.
Morning Kiss. A snow-white with slight pink in the lower throat.
Snow Princess. An older variety, but still one of the most popular whites.

PURPLE

Lancaster. Clear purple with up to 12 flowers on a straight stem.
Modern Times. An exquisite purple, good for cutting or bouquets.
Mrs. Marks Memory. A prolific bearer with straight strong stems.

ORANGE

Acca Laurentia. An orange-brown, unique in its contrast with other Glads.
Holland's Glory. Orange-yellow. One of the strongest growers with huge flowers.
New Europe. Bright orange that mixes well in bouquets or is beautiful alone.

OUTSTANDING GLADIOLUS

BIRCH RED

Smooth, pure medium red. Stands heat well. It opens from tight bud well. One of the finest.

JUMBO COLLECTION

(Big Jumbo Bulbs, 2 in. up). Many people like to purchase the largest bulbs obtainable, and true enough they will get value received. Many will produce 2 and even 3 immense spikes per bulb. If well cared for with plenty of water at blooming time, outstanding exhibition spikes can be expected. Guarantee 20 varieties or more. Not labeled.

50 Jumbo Bulbs for \$4.00
100 Jumbo Bulbs for 7.50

GWEN

The Florist's Favorite in Cut Flowers

Color rich and beautiful. A good producer for cut flowers. A variety that is consistently tall. Rose-pink.

Each \$0.50
10 for 4.50

DELUXE COLLECTION

An assortment of at least 30 of the leading varieties such as Red Charm, Burma, Silver Wings, Ravel and even varieties like Birch Red are often included. A wide range of color in every shade known to Glads. Not labeled.

100 Top Size Bulbs for \$4.95

5% DDT
DUST
with
TALC

A Dust and Spray for Insect Control

We have found DDT to be the most effective material for control of thrips. It should be used as a dust at digging time and again at cleaning. During the growing season the plant should be dusted every 7-10 days from the time the plant is 6-10 inches high until the blooms open.

Blue Leaf Hedge

Amur River Privet

Green Leaf Barberry

Midget Hedge

The Effective BLUE LEAF HEDGE

A new, charming, silvery blue-green shrub. Grows anywhere, in sun or shade, dry, wet or heavy soils where other plants perish. If left untrimmed, its feathery, willowy foliage makes a beautiful, compact, dwarf hedge 3 feet high and 2 feet wide. If trimmed it makes a colorful low, formal hedge. Just the thing for low edgings, around beds or along walks. Single specimens are delightful in the rock gardens. Plant 1 foot apart.

BRIDAL WREATH - Spirea Van Houttei

One of the best known shrubs of America. Exceptionally hardy and will grow in either sun or shade. Attains a natural height of 5-6 ft. and is completely covered with clusters of small white flowers in June. Can be trimmed any time during the summer. Plant 3 feet apart for an informal hedge.

For Any Size Hedge

Extremely Hardy—Rapid Grower

CHINESE ELM

This is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in late fall. You can trim it to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all the top, leaving only 3 to 4 inches above the ground. Plant 8 inches apart. **18 to 24 in.: 12 for \$1.25; 25 for \$2.25; 50 for \$4.25; 100 for \$8.25, postpaid.**

AMUR RIVER PRIVET

Hardy Everywhere — They Withstand The Severest Winters

Best for northeastern conditions. Will grow 10 feet in height but may be pruned to any height and sheared to desired form. Branches are upright, foliage oval or oblong; can be made very dense by pruning. Resembles California Privet in growth. Very hardy and almost an evergreen, holding its green leaves almost all winter. Plant 9 to 12 inches apart.

HEDGES

BUSH HONEYSUCKLE - Lonicera tartarica

Very hardy, growing in the poorest soil. Flowers freely in May and June with fragrant pink flowers, followed by red berries in the fall that are attractive to birds. Rapid growing, attaining a height of 8-10 ft. and is ideal for specimen planting, hedging or screening purposes. **12-18 inches: 10 for \$3.95; 25 for \$8.25; 50 for \$14.95; 100 for \$24.95, postpaid.**

GREEN LEAF BARBERRY THUNBERGII

Best all-purpose hedge of marked excellence because of its bright green foliage, changing to brilliant colors in the fall. Has bright scarlet berries throughout the winter. Dwarf and regular spreading in habit. Grows well in shade, used extensively in landscape work. Very hardy and has never been known to winter-kill. It bears and shears well and makes a dense hedge.

MIDGET HEDGE - Teucrium Chamaedrys

A low growing hedge suitable for edgings or growing in front of a wall. Resembles dwarf Boxwood, holding its leaves 10 months of the year. Grows 10-15 inches but can be sheared at any height lower than that. Hardy and thrives in most locations. Should be planted 6 inches apart for a dense hedge. **45c each; 10 for \$3.95; 25 for \$8.75; 50 for \$14.95; 100 for \$24.95, postpaid.**

RED LEAF BARBERRY

Very popular for specimen grouping and for edging taller plantings of shrubs or evergreens. Glossy purplish red leaves. Makes a brilliant colorful hedge. Plant 12 to 15 in. apart.

RHODODENDRONS

For Supreme Landscaping Effects

You'll be surprised at the growing speed of these Young Aristocrat Rhododendrons. They are small—they soon develop into fine, bushy, evergreen shrubs. You save money: you buy as low as 75c each in quantity. Quickly they grow into fine, bushy specimens, often valued at \$5.00 to \$10.00 each.

RHODODENDRON CATAWBIENSE

Grows 3-5 ft. tall. Leaves smaller than Maximum. Color of flower varies in shades of pink and rose. Grows in full sun but does best in partial or full shade.

10 to 12 in.	3	10	100
	\$3.00	\$8.75	\$75.00

RHODODENDRON MAXIMUM

Grows 5-6 ft. tall. Very hardy for full or partial shade. Color of flower varies from pink to white. Large clusters in June and early July.

10 to 12 in.	3	10	100
	\$3.00	\$8.75	\$75.00

KALMIA (Mountain Laurel)

Grows 6-8 ft. tall. Flowers vary from deep rose to pure white. Blooms from May to late June.

10 to 12 in.	3	10	100
	\$3.00	\$8.75	\$75.00

PLANTING AIDS

Rhododendrons and Kalmia require an acid soil pH 5.0-6.0. See page 20 for directions for making soil acid. Besides using Aluminum Sulphate, use plenty of leaf mold or peat moss around the roots of the plants. They do well in the shade where there is a good amount of moisture.

Rhododendrons

EVERGREEN SHRUBS

ILEX CRENATA CONVEXA

A small grower, growing four feet high and three feet across. The leaves are glossy and grow so thick that you cannot see the twigs. It is very hardy and will grow either in alkaline or acid soil, in full sun or shade. For a hedge, plant one and one-half feet apart. An evergreen that holds its leaves all winter. This blends well with other evergreens or relieves the bareness of deciduous shrubs when they have no leaves. **8-12 in., \$1.25 each; 2 for \$2.35. 12-15 in., \$1.50 each; 2 for \$2.75.**

Ilex Convexa

Azalea Mollis

From Holland AZALEA MOLLIS

Their flowers are lovely and add so much to any planting. We have imported these from Holland. Large blossoms, blooming in early spring. Fine bushy plants, about a foot tall. They prefer part shade, and do best in a soil mixed half and half with Peat Moss. The roots are very close to the surface, so a Peat Moss mulch should be kept around the plants after setting out. Keep well watered. We offer them in the following colors:

**Red, Orange, Yellow, \$2.50 each;
2 for \$4.75, postpaid**

SPECIAL COLLECTION

1 Each of 3 Colors Listed, \$6.50, postpaid

HOPA CRAB

From early spring until freezing weather, this tree will be a delight to you. The beautiful deep red blossoms distinguish the Hopa Crab from other varieties. Before the leaves are fully developed the whole tree bursts into bloom, being completely covered with the most magnificent fragrant red flowers. It is hard to imagine anything more beautiful. The foliage is dark green with red cast. Flowers are followed by the prettiest tiny red Apples that jewel the tree during the summer, and these can be used for jellies. The tree is half round in shape, growing to a spread of 15 ft. and a height of from 12 to 18 ft. **4-5 ft. trees, \$2.25 each; 2 for \$4.25, postpaid.**

New!
**SUNBURST
GOLD**

Trade Marked
Plant Patent Pending

first to have this new plant. Supply available this year definitely limited. **3-4 ft. tree, \$6.50, postpaid.**

Here for the first time. We are offering the newest of shade trees. Brightest golden bronze foliage of any plant we know. Completely free of thorns and is even more resistant to insects than Common Honey Locust. Tree is well formed, symmetrical and broadly pyramidal with excellent spreading branching habit. Sunburst's brilliant coloring is limited to 8 to 10 inches of branch tips. Here is a colored plant that won't be objectionable in any landscape. Be the

CRIMSON KING MAPLE

(Plant Patent No. 735)

You will want to be one of the first to own this new tree. It is a beautiful form of Schwedler Maple, originating in Europe. Like the Schwedler it develops a rounded, compact top of unusual symmetry, but has foliage of deep purple-crimson all through the growing months. Crimson King has been under close observation in this country for 10 years, and in every instance has kept its rich coloring throughout the season. It has been said: "Crimson King is beautiful beyond words." 25-40 ft. tall. **4-5 ft., \$4.95 each; 5-6 ft., \$5.95 each, postpaid.**
